MEDICAL TERMINOLOGY THE BASICS

FOUNDATION OF MEDICAL WORDS

A. Structure

Most medical words are composed of two or more terms. To define a medical word:

- divide the word into its terms
- analyze the terms
- define the word

Examples:

Pericarditis

peri = around; *card* = heart; *itis* = inflammation
Inflammation around the heart

Oncology

onc = tumor, mass; *logy* = study of
Study of tumors

B. Terms

Term + Term (____ + ____) = medical word

There are five categories of terms:

1. **Prefix** - beginning of a word
(*rec*, *pre*, ____ , *post* ____)

Designated by a "____" after the term.

2. **Suffix** - ending of a word
(*rec*, ____ , *stomy*, ____ , *itis*)

Designated by a "____" before the term.

3. **Root** - foundation/base of a word
(*rec*, ____ , *Append*, *gastro*)

4. **Combining vowel** - vowel (usually "o")

added to a root (*rec*, ____ , *gastro*).

Use a combining vowel when joining:

- a. Root to another root (*rec*, ____ , *gastrodermatitis*)
- b. Root to a suffix, beginning with a consonant (*rec*, ____ , *cardiomyopathy*)

5. **Combining form** - root + vowel

(*rec*, ____ , *Append*, *gastro*)

Designated by a "____" between the root and the vowel

Examples:

Hypert leukocytes

hyper (prefix) = excessive

leuko (combining form) = white

cyt (root) = cell

osis (suffix) = condition of

Definition: condition of excessive white blood cells (leukocytes)

Hematoxic

hemo (combining form) = blood

tox (root) = poison

ic (suffix) = pertaining to

Definition: pertaining to blood poisoning

TIPS:

1. Some terms have more than one definition. To determine the correct definition in a particular medical word, analyze the other terms in the word.

Example: Polymyositis

poli = gray (matter)

myo = spinal cord, bone marrow

itis = inflammation

Definition: Inflammation of the gray matter of the spinal cord. The bone marrow does not have gray matter.

2. Some terms may function as a root/combining form in one word and a suffix in another word. Classification depends upon the specific medical word.

Examples: Cytology

cyt (combining form) = cell

logy (suffix) = study of

Definition: Study of cells

Erythrocyte

erythro (combining form) = red

cyte (suffix) = cell

Definition: Red blood cell
