encompass various topics including determining the optimal secondary prevention strategy for patients with patent foramen ovale or strategies for ischemic stroke prevention in patients with atrial fibrillation following intracerebral hemorrhage Furthermore ongoing debates exist regarding the actual effectiveness of EVT in patients with large ischemic core distal vessel occlusion mild stroke syndromes or high baseline disability Additionally the comparative utility of IVT versus dual antiplatelet therapy for minor ischemic strokes remains a contentious issue Moreover discussions revolve around identifying the optimal delivery paradigm for EVT such as the choice between the drip and ship approach versus the mothership model
