intersections between music and philosophy It features articles that rethink the concepts of musical work and performance from ontological and epistemological perspectives and discuss issues of performing practices that involve the performer s and listener s perceptions In philosophy the notion of essence has enjoyed a renaissance However in the humanities in general it is still viewed with suspicion This collection examines the ideas of essence and context as they apply to music A common concern when thinking of music in terms of essence is the plurality of music There is also the worry that thinking in terms of essence might be an overly conservative way of imposing fixity on something that evolves Some contend that we must take into account the varying historical and cultural contexts of music and that the idea of an essence of music is therefore a fantasy This book puts forward an innovative approach that effectively addresses these concerns It shows that it is in fact possible to find commonalities among the many kinds of music The coverage combines philosophical and musicological approaches with bioethics biology linguistics communication theory phenomenology and cognitive science The respective chapters written by leading musicologists and philosophers reconsider the fundamental essentialist and contextualist approaches to music creation and experience in light of twenty first century paradigm shifts in music philosophy

model the role of style in the creation of and response to human artifacts and therefore to develop software systems that directly make use of style in useful ways Argamon Burns and Dubnov organize the research they have collected in this book according to the three roles that computation can play in stylistics The first section of the book Production provides conceptual foundations by describing computer systems that create artifacts musical pieces texts artworks in different styles The second section Perception explains methods for analyzing different styles and glean useful information viewing style as a form of communication The final section Interaction deals with reciprocal interaction between style producers and perceivers in areas such as interactive media improvised musical accompaniment and game playing The Structure of Style is written for researchers and practitioners in areas including information retrieval computer art and music digital humanities computational linguistics and artificial intelligence who can all benefit from this comprehensive overview and in depth description of current research in this active interdisciplinary field

The Physics and Metaphysics of Transubstantiation Mark P. Fusco,2023-08-18 In this book Mark P Fusco offers a historical philosophical and theological review and appraisal of current research into quantum post modern atheistic mathematical and philosophical theories that engage our interpretation of Hans Urs von Balthasar and Ferdinand Ulrich s accounts of Ur Kenosis This cross disciplinary approach inspires a new speculative metaphysical theory based on the representation of being as a holo somatic ontology Holocryptic metaphysics gives us a novel interpretation of transubstantiation as it is founded on the findings of quantum mechanical theory The quantum object and black hole s properties present a new way to explain physical matter based on its holographic identity This scientific theory for representing physical matter s identity is recognized for example in the symmetry existing between a subatomic particle and its orbital shell a single particle s identity in relationship to its thermodynamic system Hawking radiation and black hole entropy Further the properties of quantum non locality and teleportation signpost a new way to understand the Eternal Logos relationship to Jesus Christ and the Eucharist

History and Future David J. Staley,2010-01-01 The book reexamines this long held belief and argues that the historical method is an excellent way to think about and represent the future At the same time the book asserts that futurists should not view the future as a scientist might aiming for predictions and certainties but rather should view the future in the same way that an historian views the past

Genesis and The Lamb Lies Down on Broadway Kevin Holm-Hudson,2017-07-05 In 1974 the British progressive rock group Genesis released their double concept album The Lamb Lies Down on Broadway The story was described by Genesis s then front man Peter Gabriel as a moral fable about Rael a half Puerto Rican New York City street tough who is engulfed by a solid cloud into a series of

strange adventures in a metaphysical realm The album is a surreal allegory drawing its material from religious literary and psychological themes More than thirty years after its release The Lamb Lies Down on Broadway still enthalls listeners earning the distinction of being Genesis's most consistently selling back catalogue release Kevin Holm Hudson analyses The Lamb within the context of Genesis's recorded output within the progressive rock genre as a whole and within the context of social and political changes of the mid 1970s The Lamb marked a conscious shift in their story setting to America and for the first time the songs were oriented to the present rather than the past or future Significantly while 1974 marked the peak of music industry growth and consolidation through corporate mergers it was also the year in which America was confronted with its limits through the first of the OPEC energy crises the resignation of Richard Nixon the withdrawal from Vietnam and the effects of runaway inflation Genesis's native Britain was also to feel the effects of the energy crisis intensified by a period of economic slowdown that ultimately led to the rise of Thatcherism The Lamb is set in New York City during this time of uncertainty Within a few years the economic constraints would affect the industry as a whole and as a result progressive rock would suffer a precipitous drop in industry support The Lamb Lies Down on Broadway thus makes a particularly rich subject for detailed study providing compelling intersections between the musical textual and socioeconomic aspects of an album
