

Consider the following ER diagram and answer the following questions:

- (10%) In the relationship between customer and event, briefly describe one other relationship that could exist (in maybe another system far, far away) between these two entities and describe why the author chose the one they did over yours.
- (10%) Suppose it was important to save information about tickets to the event such as time of purchase, location of purchase, etc. How would the diagram be drawn differently? (NOTE: just explain how it would be different, do NOT redraw)
- (5%) Given the above drawing as shown, suppose your friends want to go see a specific show, how would you advise them to buy tickets?

Advances in Web-Based Learning - ICWL 2004 Wenyin Liu, Yuanchun Shi, Li Qing, 2004-07-14 With the rapid development of Web based learning and new concepts like virtual classrooms, virtual laboratories and virtual universities many issues need to be addressed. On the technical side there is a need for effective technology for deployment of Web based education. On the learning side the cyber mode of learning is very different from classroom based learning. How can instructional development cope with this new style of learning? On the management side the establishment of the cyber university poses very different requirements for the set up. Does industry/university partnership provide a solution to addressing the technological and management issues? Why do we need to standardize e learning and what can we do already? As with many other new developments more research is needed to establish the concepts and best practice for Web based learning. ICWL 2004 the 3rd International Conference on Web Based Learning was held at the Tsinghua University Beijing China from August 8th to 11th 2004 as a continued attempt to address many of the above mentioned issues. Following the great successes of ICWL 2002 Hong Kong and ICWL 2003 Australia ICWL 2004 aimed at presenting new progress in the technical, pedagogical as well as management issues of Web based learning. The conference featured a comprehensive program including a tutorial session, a keynote talk, a main track for regular paper presentations and an industrial track. We received 120 papers and accepted only 58 of them in the main track for both oral and poster presentations.

Emerging Wireless Multimedia Apostolis Salkintzis, Nikos Passas, 2005-10-31 The provision of IP based multimedia services is one of the most exciting and challenging aspects of next generation wireless networks. A significant evolution has been underway for enabling such multimedia services and for ultimately migrating the Internet to the wireless world. This book examines this evolution looking at an array of the most up to date wireless multimedia technologies and services. The first part focuses on enabling technologies for wireless multimedia while the second is dedicated to the new wireless multimedia services that are expected to play a key role in the future wireless environment. In addition the related recent standardization research and industry activities are addressed. Covers a complete range of multimedia hot topics ranging from audio/video coding techniques to multimedia protocols and applications. Discusses QoS issues in WLANs, 3G and hybrid 3G/WLAN networks. Provides in depth discussion of the most modern multimedia services such as Push to Talk, Instant Messaging, Presence, mobile payments, MMS, WAP and location based multimedia services. Addresses the emerging Multimedia Broadcast Multicast Service (MBMS) and the key aspects of IP Multimedia Subsystem (IMS) in 3G networks. Numerous online references will assist readers in their quest for the most up to date information. This comprehensive resource will have instant appeal to students in electrical and computer engineering or IT disciplines. It is also essential reading for engineering managers, engineers in wireless systems and multimedia and wireless multimedia researchers.

Information Modelling and Knowledge Bases XII Hannu Jaakkola, Hannu Kangassalo, Eiji Kawaguchi, 2001 This is the 12th volume in a series on information modelling and knowledge bases. The topics of the articles cover a wide

variety of themes in the domain of information modelling design and specification of information systems and knowledge bases ranging from foundations and theories to systems construction and application studies The contributions in this volume represent the following major themes models in intelligent activity concept modelling and conceptual modelling conceptual modelling and information requirements specification collections of concepts knowledge base design and database design human computer interaction and modelling software engineering and modelling and applications Artificial Intelligence in Education C.-K. Looi,G. McCalla,B. Bredeweg,2005-07-14 The field of Artificial Intelligence in Education includes research and researchers from many areas of technology and social science This study aims to open opportunities for the cross fertilization of information and ideas from researchers in the many fields that make up this interdisciplinary research area

Handbook of Conceptual Modeling David W. Embley,Bernhard Thalheim,2012-04-23 Conceptual modeling is about describing the semantics of software applications at a high level of abstraction in terms of structure behavior and user interaction Embley and Thalheim start with a manifesto stating that the dream of developing information systems strictly by conceptual modeling as expressed in the phrase the model is the code is becoming reality The subsequent contributions written by leading researchers in the field support the manifesto s assertions showing not only how to abstractly model complex information systems but also how to formalize abstract specifications in ways that let developers complete programming tasks within the conceptual model itself They are grouped into sections on programming with conceptual models structure modeling process modeling user interface modeling and special challenge areas such as conceptual geometric modeling information integration and biological conceptual modeling The Handbook of Conceptual Modeling collects in a single volume many of the best conceptual modeling ideas techniques and practices as well as the challenges that drive research in the field Thus it is much more than a traditional handbook for advanced professionals as it also provides both a firm foundation for the field of conceptual modeling and points researchers and graduate students towards interesting challenges and paths for how to contribute to this fundamental field of computer science **Databases**
