Automotive Computer Network Repair Mandy Concepcion, Automotive Computer Network Repair Diagnostic Strategies of Modern Automotive Systems By Mandy Concepcion In this book we will cover the intricacies of automotive inter module communication systems or networks The scope of this section will also go beyond the normal needs of an automotive technician Hence this will probably be the most difficult part of this series to comprehend Be patient and open minded Always give yourself time to absorb the knowledge and do not be discouraged Special emphasis will be placed on the CAN system Controller Area Network since it is now the standard CAN is one of the 9 OBD 2 protocols A protocol is an agreement on communications interchange It is in essence a computer communication language and specifies signaling wiring size of cables used who controls the network and voltage levels Various protocols were used in the past some proprietary and some generic such as ISO 9141 and SAE 1850 VPW but the standard is now the CAN protocol Virtually all vehicle networks now talk to each other though the CAN protocol It is now common place to see the seat belt SRS Airbag transmission ABS Brakes engine and radio modules or computer talking to each other through the network Ever wondered why your radio volume goes up when you accelerate the vehicle That s the engine computer or module telling the radio to raise the volume due to a higher RPM and hence higher ambient noise It is also common to see a non shifting transmission due to a faulty network and the issue not being related to the transmission at all Hopefully this book will shed some light on the operation and knowledge needed to tackle automotive networks in today s vehicles Enjoy Table of Contents 1 INTRODUCTION Automotive inter module communication systems or networks Asian Domestic and European Vehicles Fully Networked vehicles 2 THE NEED FOR IN VEHICLE NETWORKING Use of electrical and electronic components Networked automotive sensors Sharing of sensor information Weight savings and the simpler wiring harnesses Networking and modular systems 3 THE NEED FOR PROTOCOLS CAN or Controller Area Network communication protocol CLASS A Low speed CLASS B Medium speed CLASS C High speed SAE Society of Automotive Engineers ISO International Standards Organization What is a Gateway 4 NETWORKING ESSENTIALS the 7 layer ISO OSI reference model PHYSICAL LAYER DATA

 daSilva, Wassim Najm, U. S. Department U.S. Department of Transportation, 2006 This report presents the results of an
 analysis effort undertaken to address the following research question What sensor s can be cost effectively added to vehicles
 on a wide scale to significantly improve our understanding and modeling of naturalistic near crash pre crash driver
 performance Current sensor and computer technology allows for the efficient collection and storage of driver and vehicle
 performance data on board vehicles Crash data recorders or black boxes exist today on many vehicles though they are
 limited in number of recorded parameters and storage capacity However their capability is increasing Recent field
 operational tests of advanced technology crash avoidance systems and naturalistic driving data collection efforts have
 employed comprehensive data acquisition systems to characterize driver and vehicle performance as well as the driving
 environment These projects gathered data on driver exposure to various environmental factors and on driver encounters with
 driving conflicts near crashes and actual crashes Unfortunately the in vehicle data acquisition packages in these projects cost
 over 10 000 per vehicle It would be advantageous to build and install a very small inexpensive package under 1 000 in a
 vehicle fleet of 5 000 or more The presence of low cost near crash crash event data recorders EDRs on thousands of vehicles
 would enable a more accurate assessment of safety benefits for intelligent vehicle crash avoidance technologies and would
 greatly improve the quality of data in national crash databases such as the National Automotive Sampling System NASS
