Writing and Paper Presentation N. Gurumani, 2019-06-11 Scientific writing and communication needs to take care of a wide range of audience from students and researchers to experts The main objective of this book is to offer the basics of scientific writing and oral presentation to students and researchers working for their M Phil and Ph D degrees in science subjects This book provides information on how to write research reports theses papers for publication etc and to prepare for poster and oral presentation at conferences and scientific meetings The book also offers guidelines for preparing proposals for research projects *Citation Analysis and Dynamics of Citation Networks* Michael Golosovsky, 2019-09-26 This book

deals with the science of science by applying network science methods to citation networks and uniquely presents a physics inspired model of citation dynamics This stochastic model of citation dynamics is based on a well known copying or recursive search mechanism The measurements covered in this text yield parameters of the model and reveal that citation dynamics of scientific papers is not linear as was previously assumed This nonlinearity has far reaching consequences including non stationary citation distributions diverging citation trajectories of similar papers and runaways or immortal papers with an infinite citation lifespan The author shows us that nonlinear stochastic models of citation dynamics can be the basis for a quantitative probabilistic prediction of citation dynamics of individual papers and of the overall journal impact factor This book appeals to students and researchers from differing subject areas working in network science and bibliometrics
