expanded at an average rate of 2.43 GW/year between 2005 and 2015. Renewable energy is growing particularly solar and wind and geothermal about 9.7 GW of renewable energy capacity was installed between 2010 and 2016. Over this period the net electricity generation in SSA increased at 9.1 TWh/year more than double the historical average growth of 4.02 TWh/year 1990-2010. In general the study found that rates of electrification across the entire region are more than twice the historical rates and an average of at least 26 million people are now gaining access to electricity yearly. Nevertheless progress is uneven across SSA. As of 2016 almost half of the population without electricity access live in Nigeria, DR Congo, Ethiopia, Tanzania and Uganda. Quantitative analysis suggests that about 70 million people in SSA would have to gain access every year from 2017 to achieve universal access by 2030. Overall SSA countries with national programs on energy access supported by policy, regulatory framework and infrastructure investment are making progress.
