literature in the area of maritime law in Nigeria was what motivated the author to embark on this project and as such this book is the authors attempt to contribute to the bridging of the gap in knowledge in this area of the law This book is written in simple and understandable English to ensure fluidity of reading It is presented in such a way as to provide information in the areas of commercial law carriage of goods by sea maritime law as well as practical steps in maritime law litigation and related actions Particular consideration has been given to the study of carriage of dangerous goods by sea a subject which existing legal literature in Nigeria merely mentioned in passing Suffice it to say that this book is the first Nigerian legal literature that has explored that subject taking into consideration our domestic laws and international treaties most of which are yet to be ratified and domesticated in Nigeria Though the work has Nigeria as its geographical location it has discussed the subject with comparative analysis of contemporary development in some areas of maritime law with special reference to the United Kingdom and the United States It is the authors belief that this book apart from providing practical guide to maritime litigation in Nigeria would also serve as veritable tool for teaching and studying of maritime law and related courses in Nigerian Universities and other territory institutions and would be immeasurably useful to legal practitioners members of the bench an research fellows Dr C O Chijioke Faculty of Law Abia State University

Preventing Terrorist Attacks at Sea Robin Bowley, 2022-12-23 Over recent decades it has been widely recognised that terrorist attacks at sea could result in major casualties and cause significant disruptions to the free flow of international shipping After discussing the overlaps and distinctions between piracy and maritime terrorism this book considers how the International Ship and Port Facility Security Code and other vessel identification and tracking measures in the 1974 International Convention for the Safety of Life at Sea would be likely to reduce the risk of terrorist attacks at sea It explains how the 1982 United Nations Convention on the Law of the Sea is less than clear on the powers of states to protect offshore installations submarine cables and pipelines from interference by terrorists In light of these uncertainties it considers how the 2005 Protocol to the Convention for the Suppression of Unlawful Acts Against Maritime Navigation the doctrine of necessity and states inherent self defence rights might apply in the maritime security context A significant contribution of the book is the formulation of the Maritime Terrorism Threat Matrix which provides a structured framework for examining how maritime terrorism incidents have occurred and might occur in the future The book also examines the relevant national maritime security legislation for preventing maritime terrorist attacks in the United Kingdom and in Australia The book concludes by formulating guidelines for the unilateral interdiction of suspected terrorist vessels in exceptional circumstances and recommending priorities for governments and international maritime industries to focus on in order to reduce the risk for terrorist attacks at sea It will be of interest to those working in the areas of Law and Terrorism Law of the Sea Maritime Law and Insurance and International Law
