

BEFORE IMPRIVATA ONESIGN	AFTER IMPRIVATA ONESIGN
Users struggled to remember anywhere from 15-25 passwords needed to access a variety of regular and internet-based applications.	Improved productivity with finger biometrics which provided secure, single sign-on access to more than 25 applications.
New password policy requirements complicated employee efforts to remember passwords.	Flexible password policy setting by user groups and transparent periodic password changes.
Helpdesk was inundated with password reset calls.	Elimination of 95% of password-related reset calls.

To educate users on the authentication process, the Justice FCU internal training department created a two-page training guide. "The entire manual consisted of only ten lines of instructions and associated images to illustrate authentication steps. All employees grasped it quite easily," continues Ikram.

### THE RESULTS

The implementation of SSO and finger biometrics has allowed Justice FCU to do more with less. Employees save time because they are not struggling to remember forgotten passwords, they are not locked out of applications, and they are not calling the helpdesk for password resets. Users have secure access without having to remember their passwords. "All of our employees—whether loan officers, customer service reps, or IT—are more productive. In addition, customer-facing employees can dedicate more time to serving member needs," says Ikram.

Even with the strictest of password policies in place, the Credit Union's employees have no cause to write down or share passwords. "The combination of SSO and finger biometrics enables us to enhance our security without burdening our users," continues Ikram.

At the same time, fast and easy access to applications and websites reduces the burden on the helpdesk. "We've eliminated 95% or more of password-related reset calls. All of our employees are delighted with the positive impact the solution has made," concludes Ikram.

*"Among its many benefits, Imprivata supports multiple strong authentication methods. In fact, organizations can even use it with multiple, interchangeable methods, making it an extremely flexible solution."*
