Liberating Temporariness? Leah F. Vosko, Valerie Preston, Robert Latham, 2014-06-01 *Liberating Temporariness* explores the complex ways in which temporariness is being institutionalized as a condition of life for a growing number of people worldwide. The collection emphasizes contemporary developments but also provides historical context on nation state membership as the fundamental means for accessing rights in an era of expanding temporariness in recognition of why pathways to permanence remain so compelling. Through empirical and theoretical analysis contributors explore various dimensions of temporariness especially as it relates to the legal status of migrants and refugees to the spread of precarious employment and to limitations on social rights. While the focus is on Canada a number of chapters investigate and contrast developments in Canada with those in Europe as well as Australia and the United States. Together these essays reveal changing and enduring temporariness at local regional national transnational and global levels and in different domains such as health care language programs and security. The question at the heart of this collection is whether temporariness can be liberated from current constraints. While not denying the desirability of permanence for migrants and labourers *Liberating Temporariness* presents alternative possibilities of security and liberation.

Solis, 2016-04-18 Newly revised and expanded *The Law of Armed Conflict* 2nd edition introduces law students and undergraduates to the law of war in an age of terrorism. What law of armed conflict LOAC or its civilian counterpart international humanitarian law IHL applies in a particular armed conflict? Are terrorists legally bound by that law? What constitutes a war crime? What or who is a lawful target and how are targeting decisions made? What are rules of engagement and who formulates them? How can an autonomous weapon system be bound by the law of armed conflict? Why were the Guantánamo military commissions a failure? This book takes students through these LOAC/IHL questions and more employing real world examples and legal opinions from the US and abroad. From Nuremberg to 9/11 from courts martial to the US Supreme Court from the nineteenth century to the twenty first the law of war is explained interpreted and applied.

Indefinite Detention Kimberly Alexa Koenig, 2013 This dissertation focuses on the experiences of former Guant namo detainees as communicated in 78 interviews An analysis of those interviews centers on former detainees worst experiences to parse how those experiences might inform society s understanding of cruel inhuman and degrading treatment The dissertation is organized into nine chapters Chapter one situates this study in the context of the United States response to the events of 9 11 with an emphasis on the imprisonment of individuals at the U S detention center in Guant namo Bay Cuba This chapter summarizes the major philosophical legal and social science research relevant to detainees experiences including analyses of cruel inhuman and degrading treatment and explains how this dissertation contributes to existing empirical work In this chapter I argue that Guant namo is an example of the United States use of incarceration as a means of social control that has extended beyond the nation s borders and discuss the possible relationship of political military prisons to the phenomenal growth of supermax prisons in the United States Chapter two offers a history of the prohibition against cruel inhuman and degrading treatment through the end of the twentieth century This chapter expands upon the legal framework presented in the introduction to demonstrate the prohibition s origins and evolution and the ways in which judicial interpretations have increasingly distorted its intended breadth Of course understanding the law and its

contemporary expression requires attention to the political forces that motivate its development and shape its parameters Accordingly chapter three builds on the history in chapter two to describe the United States legal and political responses to the events of September 11 2001 In the process chapter three illustrates the legal and political voids into which many detainees were thrust a phenomenon that culminated in an invisibility and voicelessness that facilitated later abuse Chapter four introduces the men whose stories form the basis of this dissertation This chapter provides an overview of my research methodology explains the sources for the interviews highlights research limitations and issues important caveats regarding the extension of my dissertation findings Chapter five the first empirical chapter details former detainees responses to the question what was your worst detainment related experience to demonstrate the varied nature of abuse and reveal the ways in which existing jurisprudence fails to adequately recognize and prevent numerous harms Importantly from a theoretical perspective chapter five illustrates several of the mechanisms that contributed to detainees experience of cruel inhuman and degrading treatment and demonstrates the link between ill treatment and threats to identity Chapter six focuses in on one form of degrading treatment sexual violence to provide a more fine grained analysis of the relationship between degrading treatment and identity Descriptively this chapter contributes to an empirical understanding of male sexual violence and especially sexual violence as it occurs in political military prisons Finally this chapter underscores the critical role of culture in interpretations of cruel inhuman and degrading treatment arguing that objective and subjective legal analyses of such treatment should better incorporate cultural perspectives Chapter seven posits that inhuman and degrading treatment are experienced as particularly egregious because they threaten a social versus physical death This chapter illuminates the mechanisms through which social death occurred at Guantanamo and discusses how for many men the experience of social death extended beyond their confinement into their release Chapter eight the final substantive chapter addresses the issue of prison resistance Empirically this chapter documents former detainees stories of resistance providing a basis for better understanding when why how and in what ways former detainees resist institutional practices This chapter also highlights when resistance did not occur drawing a negative space around the phenomenon of resistance to more clearly pinpoint its parameters Theoretically this chapter emphasizes the ways in which threats to identity engender resistance I conclude that much detainment related resistance reflects at its core a struggle for the survival of both social and self identity and that failing to recognize this link can have serious implications not only for prisoners but for prison personnel and the institutions in which they are embedded Chapter nine weaves these chapters together to present an empirically supported theory of cruel inhuman and degrading treatment one that is intimately tied to the stories of former detainees In this chapter I make several recommendations regarding the ways in which detainees experiences might inform future jurisprudence enabling that jurisprudence to more fully acknowledge the character and scope of cruel inhuman and degrading treatment This chapter explains how the dissertation when considered as a whole offers a detailed analysis of the very worst institutional

treatment as perceived by those who were themselves once labeled the very worst
