**Health Humanities** Craig M. Klugman, Erin Gentry Lamb, 2019-09-02 Research Methods in Health Humanities surveys the

diverse and unique research methods used by scholars in the growing transdisciplinary field of health humanities. Appropriate for advanced undergraduates but rich enough to engage more seasoned students and scholars, this volume is an essential teaching and reference tool for health humanities teachers and scholars. Health humanities is a field committed to social justice and to applying expertise to real world concerns, creating research that translates to participants and communities in meaningful and useful ways. The chapters in this field defining volume reflect these values by examining the human aspects of health and health care that are critical, reflective, textual, contextual, qualitative and quantitative. Divided into four sections, the volume demonstrates how to conduct research on texts, contexts, people and programs. Readers will find research methods from traditional disciplines adapted to health humanities work, such as close reading of diverse texts, archival research, ethnography, interviews and surveys. The book also features transdisciplinary methods unique to the health humanities, such as health and social justice studies, digital health humanities and community dialogues. Each chapter provides learning objectives, step by step instructions, resources and exercises with illustrations of the method provided by the authors' own research. An invaluable tool in learning, curricular development and research design, this volume provides a grounding in the traditions of the humanities, fine arts and social sciences for students considering health care careers, but also provides useful tools of inquiry for everyone as we are all future patients and future caregivers of a loved one.

**Literature and Medicine** Anna M. Elsner, Monika Pietrzak-Franger, 2024-01-18. The experiences of health and illness, death and dying, the normal and the pathological have always been an integral part of literary texts. This volume considers how the two dynamic fields of medicine and literature have crossed over and how they have developed alongside one another. It asks how medicine, as both science and practice, shapes the representation of illness and transforms literary form. It considers how literary texts across genres and languages of disease have put forward specific conceptions of medicine and impacted its practice. Taking into account the global, multilingual and multicultural contexts, this volume systematically outlines and addresses this double-sidedness of the literature-medicine connection. *Literature and Medicine* covers a broad spectrum of conceptual, thematic, theoretical and methodological approaches that provide a solid foundation for understanding a vibrant interdisciplinary field.

**Applied Global Health Humanities** Fella Benabed, 2024-07-01. This book highlights the importance of global Anglophone literature in global health humanities, shaping perceptions of health issues in the Global South and among minorities in the Global North. Using twelve novels, it explores the historical, political, sociocultural, ethical and environmental aspects of health by analyzing the experiences of characters who suffer from infectious diseases, mental disorders or disabilities and who seek holistic healing practices.
