Testing and Assessment in Translation and Interpreting Studies Claudia V. Angelelli, Holly E. Jacobson, 2009 Testing and Assessment in Translation and Interpreting Studies examines issues of measurement that are essential to translation and interpreting Conceptualizing testing both as a process and a product the collection of papers explores these issues across languages and settings including university classrooms research projects the private sector and professional associations The authors have approached their chapters from different perspectives using a variety of methods some focusing on very specific variables and others providing a much broader overview of the issues at hand Chapters range from a discussion of the measurement of text cohesion in translation the measurement of interactional competence in interpreting the use of a particular scale to measure interpreters renditions to the application of a specific approach to

grading or general program assessment such as interpreter or translator certification at the national level or program admissions processes These studies point to the need for greater integration of research and practice in the specific area of testing and assessment and are a welcome addition to the field

Medical Interpreting and Cross-cultural Communication

Claudia V. Angelelli, 2004-10-21 When healthcare providers and patients do not speak the same language medical interpreters are called in to help In this book the first ever ethnographic study of a bilingual hospital Claudia Angelelli explores the role of medical interpreters drawing on data from over 300 medical encounters and interviewing the interpreters themselves about the people for whom they interpret their challenges and how they characterize their role Traditionally the interpreter has been viewed as a language conduit with little power over the medical encounter or the relationship between patient and provider This book presents an alternative view considering the interpreter's agency and contextualizing the practice within an institution that is part of a larger society Bringing together literature from social theory social psychology and linguistic anthropology this book will be welcomed by anyone who wants to discover the intricacies of medical interpreting firsthand particularly researchers communication specialists policy makers and practitioners
