BrilliantColor™ Technology and Mitsubishi's Engineering Yields Superior Color Performance

BrilliantColor™ Technology is Mitsubishi's latest innovation for richer color and better imaging for smart displays. At Mitsubishi, our development engineers color sensitive displays RGBWTC. Apart from the typical red, green, blue and white, we added yellow and cyan segments to display a wider color spectrum. In addition, we added our color algorithm to reproduce brightness of color mixes, designed to match the environment where the XD510U-G is used.

Together with selected lamp power modulation techniques, the XD510U-G with BrilliantColor™ Technology can intelligently reduce color to improve the intensity and vibrant of on-screen display. For instance, when projecting an already bright screen image, the lamp is programmed to provide brighter, more vivid colors. In contrast, if the image shows greater color reproduction, the algorithm reduces just the right colors with the appropriate intensity for maximum visual impact.

BrilliantColor™ is a trademark of Mitsubishi.
