MEDIA

REVOLUTIONARY REMOVABLE MEDIA. Location recorders need a removable media. It was one of the requests that we heard from the field again and again. Part of the success of the portable timecode SRT format was the fact that at the end of the shoot, the days work is there in your hand. We knew that normal DVD-R/RW drives are not really built for the rigours of location recording and certainly not suited to being slung over a shoulder. Therefore we decided upon a brand-new from DVD-RAM

drive, a drive specially developed for the rigours of portable use and a drive designed from the ground-up to provide vibration stability, high speed access and most importantly, high reliability. Already proving itself in motion pictures, in productions and outside broadcast, the removable from DVD-RAM cartridges provide two 1.46GB sides, offering, for example, 108 minutes per disc of 4-track recording at 48KHz/14-bit. And the discs fit right into conventional DVD drives.

MIXER

FULLY FEATURED ON-BOARD MIXER

The six channel mixer accepts either microphone level, with both 5-Power (25W) and Phantom power (48V) available, or line level. Phase reverse is provided on the three stereo channels while each channel features adjustable input gain, a generous defatatable and variable high pass filter and an individual selectable limiter, with software selectable characteristics and linking, suited to location recording.

The most ingenious part of the mixer however is the routing capability: working in conjunction with each channel's level control mounted on the face of the PS-6, the 'Stereo Feed' switch allows the recording section of the machine to derive its audio feed from the channel level control, meaning levels are set once with the earlier trim pot, leaving the level level controls for bus mixing. PGND of the channel level control providing for regular level adjustment on the easily-accessible controls, or from the Stereo Bus, routed by the PGND switch providing

not only simple stereo mixing of all six channels, but also by using a combination of the mixers, parallel mix signals tracks can be made whilst recording of either five tracks (mono guide track) or four tracks (stereo guide track). We call these "3+3" and "2+4" recording modes as separate 50% files are created. Additional features such as PFL monitoring and peak led indication on each channel complete this very flexible mixer.
