Damage and Fracture Mechanics Taoufik Boukharouba, Mimoun Elboujdaini, Guy Pluvineau, 2009-08-09 The First African InterQuadrennial ICF Conference AIQ ICF2008 on Damage and Fracture Mechanics: Failure Analysis of Engineering Materials and Structures Algiers, Algeria, June 1-5, 2008, is the first in the series of InterQuadrennial Conferences on Fracture to be held in the continent of Africa. During the conference, African researchers have shown that they merit a strong reputation in international circles and continue to make substantial contributions to the field of fracture mechanics. As in most countries, the research effort in Africa is undertaken at the industrial, academic, private sector, and governmental levels and covers the whole spectrum of fracture and fatigue. The AIQ ICF2008 has brought together researchers and engineers to review and discuss advances in the development of methods and approaches on Damage and Fracture Mechanics. By bringing together the leading international experts in the field, AIQ ICF promotes technology transfer and provides a forum for industry and researchers of the host nation to present their accomplishments and to develop new ideas at the highest level. International Conferences have an important role to play in the technology transfer process, especially in terms of the relationships to be established between the participants and the informal exchange of ideas that this ICF offers.

The CRC Handbook of Mechanical Engineering, Second Edition, 1998-03-24 During the past 20 years, the field of mechanical engineering has undergone enormous changes. These changes have been driven by many factors, including the development of computer technology, worldwide competition, industry improvements in the flow of information, satellite communication, real-time monitoring, increased energy efficiency, robotics, automatic control, increased sensitivity to environmental impacts, human activities, advances in design, and manufacturing methods.

These developments have put more stress on mechanical engineering education making it increasingly difficult to cover all the topics that a professional engineer will need in his or her career As a result of these developments there has been a growing need for a handbook that can serve the professional community by providing relevant background and current information in the field of mechanical engineering The CRC Handbook of Mechanical Engineering serves the needs of the professional engineer as a resource of information into the next century
