Worm Work Janelle A. Schwartz, 2012 Worms Natural history is riddled with them Literature is crawling with them From antiquity to today the ubiquitous and multiform worm provokes an immediate discomfort and unconscious distancing it remains us against them in anthropocentric anxiety So there is always something muddled or dirty or even offensive when talking about worms Rehabilitating the lowly worm into a powerful aesthetic trope Janelle A Schwartz proposes a new framework for understanding such a strangely animate nature Worms she declares are the very matter with which the Romantics rethought the relationship between a material world in constant flux and the human mind working to understand it Worm Work studies the lesser known natural historical records of Abraham Trembley and his contemporaries and the familiar works of Erasmus Darwin Charles Darwin William Blake Mary Shelley and John Keats to expose the worm as an organism that is not only reviled as a taxonomic terror but revered as a sign of great order in nature as well as narrative This book traces a pattern of cultural production a vermiculture that is as transformative of matter as it is of mind It distinguishes decay or division as positive processes in Romantic era writings compounded by generation or renewal and used to represent the biocentric complex structuring of organicism Offering the worm as an archetypal figure through which to recast the evolution of a literary order alongside questions of taxonomy from 1740 to 1820 and on Schwartz unearths Romanticism as a rich humus of natural historical investigation and literary creation

Frankenstein Mary Shelley, 2020-09-16 In this new edition of Mary Shelley's Frankenstein David Wootton's Introduction gives the reader both a clear and gripping account of the biographical circumstances that led to the novel's writing and the most striking and original interpretations of its central themes and of the intellectual and cultural influences on them Offering a new account of the complex history of its composition and drawing upon his deep knowledge of eighteenth and nineteenth century scientific debates Wootton reveals the ways in which the origins of Shelley's novel are inextricably linked to conceptions of the origins of life itself We have here a transformative reading of one of the world's best known stories Laura Marcus Goldsmith's Professor of English Literature and Fellow of New College University of Oxford

Frankenstein Susan E. Lederer, 2002 This title highlights Shelley's novel and the context in which she conceived it It then focuses on the redefinition of the Frankenstein myth in popular culture The final section examines the continuing power of the story to articulate present day concerns raised by developments in biomedicine

The Poetry of Erasmus Darwin Martin Priestman, 2016-02-24 While historians of science have focused significant attention on Erasmus Darwin's scientific ideas and milieu relatively little attention has been paid to

Darwin as a literary writer In *The Poetry of Erasmus Darwin Enlightened Spaces Romantic Times* Martin Priestman situates Darwin's three major poems *The Loves of the Plants* 1789 *The Economy of Vegetation* 1791 and *The Temple of Nature* 1803 and Darwin himself within a large polymathic late Enlightenment network of other scientists writers thinkers and social movers and shakers Interpreting Darwin's poetry in terms of Darwin's broader sense of the poetic text as a material space he posits a significant shift from the Enlightenment's emphases on conceptual spaces to the Romantic period's emphases on historical time He shows how Darwin's poetry illuminates his stance toward all the major physical sciences and his well formulated theories of evolution and materially based psychology Priestman's study also offers the first substantial accounts of Darwin's mythological theories and their links to Enlightenment Rosicrucianism and Freemasonry and of the reading of history that emerges from the fragment poem *The Progress of Society* a first ever printed edition of which is included in an appendix Ultimately Priestman's book offers readers a sustained account of Darwin's polymathic Enlightenment worldview and cognate poetics in a period when texts are too often judged by their adherence to a retrospectively constructed Romanticism

Gothic Hauntings Christine Berthin, 2010-04-09 What is buried in the crypts of the Gothic Building on psychoanalytic research on haunting cryptonymy and melancholy as well as on French philosophies of language this book explores how haunting is not just a Gothic narrative device but the symptom of an impossibility of representation and of an irreparable loss at the heart of language

Imagination and Science in Romanticism Richard C. Sha, 2021-03-02 How did the idea of the imagination impact Romantic literature and science 2018 Winner Jean Pierre Barricelli Book Prize The International Conference on Romanticism Richard C Sha argues that scientific understandings of

the imagination indelibly shaped literary Romanticism Challenging the idea that the imagination found a home only on the side of the literary as a mental vehicle for transcending the worldly materials of the sciences Sha shows how imagination helped to operationalize both scientific and literary discovery Essentially the imagination forced writers to consider the difference between what was possible and impossible while thinking about how that difference could be known Sha examines how the imagination functioned within physics and chemistry in Percy Bysshe Shelley's Prometheus Unbound neurology in Blake's Vala or The Four Zoas physiology in Coleridge's Biographia Literaria and obstetrics and embryology in Mary Shelley's Frankenstein He also demonstrates how the imagination was called upon to do aesthetic and scientific work using primary examples taken from the work of scientists and philosophers Davy Dalton Faraday Priestley Kant Mary Somerville Oersted Marcet Smellie Swedenborg Blumenbach Buffon Erasmus Darwin and Von Baer among others Sha concludes that both fields benefited from thinking about how imagination could cooperate with reason but that this partnership was impossible unless imagination's penchant for fantasy could be contained

The Smallpox Report Fuson Wang, 2023-03-30 After the COVID 19 pandemic vaccination has become synonymous with an opaque biopower that legislates compulsory immunization at a distance Contemporary illness narratives have become outlets for distrust misinformation reckless denialism and selfish noncompliance In The Smallpox Report Fuson Wang rewinds this contemporary impasse between physician and patient back to the Romantic era origins of vaccination The book offers a literary historical account of smallpox vaccination contending that the disease's eventual eradication in 1980 was as much a triumph of the literary imagination as it was an achievement of medical Enlightenment science Wang traces our modern pandemic era crisis of vaccine hesitancy back to Edward Jenner's publication of his treatise on vaccination in 1798 the first rumblings of an anti vaccination movement and vaccination's formative literary history that included authors such as William Wordsworth William Blake John Keats Mary Shelley and Arthur Conan Doyle The book concludes with a re examination of the current deeply contentious public discourse about vaccines that has arisen in the wake of the COVID 19 pandemic By recovering the surprisingly literary genres of Romantic era medical writing The Smallpox Report models a new literary historical perspective on our own crises of vaccine refusal
