Course description: This course provides the student with hands-on experience with a variety of living and preserved organisms, including animals, plants, fungi, protozoa, algae, and bacteria, and the principles of evolution and ecology that unite them. This course is designed for non-science majors.

Course objectives: As a consequence of completing this course, the student will be able to:

1. To allow students to develop laboratory skills and techniques; to read and follow directions; and to perform experiments requiring analysis and interpretation of data, as well as written discussion of the results.
2. Identify and describe the distinguishing features of each of the kingdoms, and the major groups within each kingdom.
3. Identify particular specimens as members of the kingdoms and their subgroups.
4. State the major premises of the theory of evolution by natural selection, and identify and explain examples of evidence for the theory.
5. Relate the characteristics of living organisms and preserved specimens to life processes.
6. Collect, analyze, and use data to describe the interactions among organisms and their environments.

Required text: Mader, Sylvia S. 2007. Biology 1403 – Selected Labs from Biology Laboratory Manual - 9th ed.
