Gerald M. Phillips ,2005 *Communication Incompetencies* Gerald M. Phillips,1991 Gerald M Phillips draws on his twenty five year five thousand client experience with the Pennsylvania State University Reticence Program to present a new theory of modification of inept communication behavior That experience has convinced Phillips that communication is arbitrary and rulebound rather than a process of inspiration He demonstrates that communication problems can be described as errors that can be detected and classified in order to fit a remediation pattern Regardless of the source of error the remedy is to train the individual to avoid or eliminate errors thus orderly procedure will result in competent performance Inept communicators must be made aware of the obligations and constraints imposed by deep structures that require us to achieve a degree of formal order in our language without which our discourse becomes incomprehensible *Merchant Vessels of the United States* ,1989 **Official National Guard Register (Army)** United States. National Guard Bureau,1936 **Official National Guard Register** United States. National Guard Bureau,1936 *Speaking With Confidence and Skill* Lynne Kelly,Arden K. Watson,1989-04-11 Convinced that public speaking fears outranked all other fears the authors combined their years of teaching novice speakers to set forth their techniques for reducing apprehension and sharpening communication performance skills The three basic techniques stressed are cognitive structuring or attitude change relaxation techniques and skills training All of the topics addressed herein are intended for students in basic speech communication classes Some of the topics are the process of communication assessing yourself as a communicator improving attitudes and reducing apprehension preparing and delivering a public speech improving skills in group discussions as well as in all types of social relationships First published by Harper and Row in 1986 **Electronic Tribes** Tyrone L. Adams,Stephen A. Smith,2009-06-03 Whether people want to play games and download music engage in social networking and professional collaboration or view pornography and incite terror the Internet provides myriad opportunities for people who share common interests to find each other The contributors to this book argue that these self selected online groups are best understood as tribes with many of the same ramifications both positive and negative that tribalism has in the non cyber world In *Electronic Tribes* the authors of sixteen competitively selected essays provide an up to the minute look at the social uses and occasional abuses of online communication in the new media era They explore many current Internet subcultures including MySpace com craftster org massively multiplayer online role playing games MMORPGs such as World of Warcraft music downloading white supremacist and other counterculture groups and Nigerian e mail scams Their research raises compelling questions and some remarkable answers about the real life social consequences of participating in electronic tribes Collectively the contributors to this book capture a profound shift in the way people connect as communities formed by geographical proximity are giving way to communities both online and offline formed around ideas *Merchant Vessels of the United States...* United States. Coast Guard,1964 **Living with an Aging Brain** Robert Werman,2003 Grow old along

with me The best is yet to be wrote Robert Browning in his poem Rabbi Ben Ezra Those of us approaching or already inhabiting this unknown land might not entirely agree but in this inspiring volume by Dr Werman we are shown how to make the most of old age especially as regards our brains and how to use them to lead fulfilling lives The book is packed with useful scientific facts on aging and how to differentiate between the symptoms of merely the wear and tear of our bodies and brains and real disease It is aimed at members of the general public and contains fascinating real life examples some of them from Dr Werman s own practice as a neurologist and his life experience Students as Real People Robert T. Anderson,2020-02-13 A teacher of communication expresses his concern for thousands of students who are cheating themselves out of a worthwhile education by falling into the accepted role of nonperson uninvolved in the education process In this book the author fosters a belief that success or failure in college depends on communication interdependent efforts of people in a relationship to generate common meaning He proposes to get students to realize that their education is something other students can help them develop as much as teachers The author uses a personal style of writing to talk with the students He uses examples from the students immediate campus environment in challenging them to question their roles in the educational process Written for and tested in interpersonal communication courses the book is also appropriate for teacher education courses orientation to college life courses and for college counseling centers
