Hopes and Ambitions of Left-Behind Children in Rural China Yang Hong,2021-10-14 This monograph highlights the
educational experiences of rural children who are left behind by their migrant worker parents in China analyzing how this
situation impacts on their aspirations and self identity Via an ethnographic and qualitative case study of a rural school in
southwest China the author presents the real lives of these disadvantaged children along with their challenges and needs and
provides an in depth understanding of how being left behind impacts on their future aspirations Building on the sociological
theories of Pierre Bourdieu the author makes an original contribution by combining seemingly incompatible disciplinary
perspectives such as cultural capital from sociology rational action from behavioral economics and self efficacy from
psychology Hence the book endeavors to transfer these Western theories to an Eastern context and demonstrates cultural
nuances that are not always captured when applied in the West The book will attract academic scholars and postgraduate
students in the area of socially disadvantaged children and young people as well as those who are working on youth studies
