Papers ,1929 Yearbook ,1929 Faculty Misconduct in Collegiate Teaching John M. Braxton,Alan E. Bayer,2003-04-30 In Faculty Misconduct in Collegiate Teaching higher education researchers John Braxton and Alan Bayer address issues of impropriety and misconduct in the teaching role at the postsecondary level Braxton and Bayer define and examine norms of teaching behavior what they are how they come to exist and how transgressions are detected and addressed Do faculty members across various collegiate settings for example share views about appropriate and inappropriate teaching behaviors as they share expectations regarding actions related to research And what mechanisms are utilized to correct inappropriate behavior on the part of college and university teachers The authors work is based on survey results obtained from faculty members at research universities liberal arts colleges and two year community junior and technical colleges Braxton and Bayer s focus is on undergraduate teaching in four disciplines biology history mathematics and psychology In their analyses the authors examine how individual disciplinary and institutional differences influence professorial behavior In contrast to the more explicitly understood and enforced rules of conduct in research the authors find that teaching norms are informally defined and observed They argue that a formal code of ethics for undergraduate teaching would serve the dual purpose of improving undergraduate education and elevating the status of college teaching A groundbreaking study of contemporary academe Faculty Misconduct in Collegiate Teaching is required reading for all university and college instructors and administrators **Yearbook** National Education Association of the United States. supervision and evaluation aligned with the reform The schools responded to the reform following school people s raising practical concerns as well as the established school culture Merits School arrived at a two faced strategy to cope with the reform Pioneer School managed to maintain a balance between promoting reform pedagogy and maintaining good test rankings Both schools marginally involved parents in the implementation of the reform This study suggests that to achieve success reformers need to place equal emphasis on the transformation of teachers as well as local policymakers This book enriches the existing literature on the implementation of mathematics curriculum reform at the school level and brings insights into the schools implementation decisions which will appeal to policymakers curriculum researchers and administrators
