Geographers Elizabeth Baigent, André Reyes Novaes, 2018-11-15 Geographers Biobibliographical Studies Volume 37 explores the concept of distinction in geography Through the lives of six geographers working in Brazil North America Europe and R union it investigates what distinction consists of how we identify and celebrate it and how it relates to quotidian practices in the discipline The volume highlights the continuing importance of biography and the International Geographical Union in recording and assessing distinction It also considers the relevance of personal networks for the circulation and translation of distinguished geographical knowledge and how this knowledge can underpin applied projects and critical appraisal of geographical scholarship both at a national and sub national level Gendered notions of distinction are also addressed particularly through June Sheppard who found limited recognition for her work as a result of gendered expectations within the discipline and society at large By reflecting on how we locate distinguished geographers and tell their histories Geographers Biobibliographical Studies Volume 37 makes an important contribution to fostering less canonical work in historical geography

The Complacent Class Tyler Cowen, 2017-02-28 A Wall Street Journal and Washington Post Bestseller Tyler Cowen's blog Marginal Revolution is the first thing I read every morning And his brilliant new book The Complacent Class has been on my nightstand after I devoured it in one sitting I am at round the clock Cowen saturation right now Malcolm Gladwell Since Alexis de Tocqueville restlessness has been accepted as a signature American trait Our willingness to move take risks and adapt to change have produced a dynamic economy and a tradition of innovation from Ben Franklin to Steve Jobs The problem according to legendary blogger economist and best selling author Tyler Cowen is that Americans today have broken from this tradition we're working harder than ever to avoid change We're moving residences less marrying people more like ourselves and choosing our music and our mates based on algorithms that wall us off from anything that might be too new or too different Match.com matches us in love Spotify and Pandora match us in music Facebook matches us to just about everything else Of course this matching culture brings tremendous positives music we like partners who make us happy neighbors who want the same things We're more comfortable But according to Cowen there are significant collateral downsides attending this comfort among them heightened inequality and segregation and decreased incentives to innovate and create The Complacent Class argues that this cannot go on forever We are postponing change due to our near sightedness and extreme desire for comfort but ultimately this will make change when it comes harder The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis impossibly expensive rentals for our most attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves

out of their comfortable slumber to embrace their restless tradition again **10 Years Solved Papers for Humanities ISC Class 12 (2022 Exam) - Comprehensive Handbook of 11 Subjects - Yearwise Board Solutions** Gurukul,2021-06-15
