Drink and British Politics Since 1830 J. Greenaway,2003-06-10 The issue of alcohol has never been far from British politics Initially governments needed to control its sale for public order reasons and because it was a major source of revenue Then in Victorian times a powerful temperance movement arose which sought to prohibit or severely curb the Demon Drink This in turn aroused the hostility of the Trade and the issue became one of fierce electoral politics After 1890 drink was interpreted more as a social reform question and then in the First World War after a major moral panic far reaching measures of direct state control were imposed in the interests of national efficiency Later in the Twentieth century alcohol use came to be seen as an aspect of leisure and town planning and more recently as a health issue Drawing upon a wide range of primary sources John Greenaway uses the complex politics of the issue to shed light upon the changing political system and to test various theories of the policymaking process Both historians and political scientists will be interested in this study

The New Wealth of Cities John Montgomery,2017-09-29 Over the past two decades city economies have restructured in response to the decline of older industries This has involved new forms of planning and urban economic development a return to traditional concerns of city building and a focus on urban design During this period there has also been a marked rise in our understanding of cultural development and its role in the design economy and life of cities In this book John Montgomery

argues that this amounts to a shift in urban development He provides a long overdue look at the dynamics of the city that is how cities work in relation to the long cycles of economic development and suggests that a new wave of prosperity built on new technologies and new industries is just getting underway in the Western world The New Wealth of Cities focuses on what effect this will have on cities and city regions and how they should react Original and wide ranging this book will be a definitive resource on city economies and urban planning explaining why it is that cities develop over time in periods of propulsive growth and bouts of decline **The Chemical Trade Journal** ,1887 **The Spectator** ,1842 A weekly review of politics literature theology and art A City for All Jo Beall,1997 By the turn of the century more than half the world s population will live in urban areas This rapid pace of urbanization is forcing a rethinking of development priorities and this book explores some of those initiatives **Gardeners' Chronicle** ,1849 **Normal Instructor and Teachers World** ,1919
