Information Processing Sabri Arik,Tingwen Huang,Weng Kin Lai,Qingshan Liu,2015-12-08 The four volume set LNCS 9489 LNCS 9490 LNCS 9491 and LNCS 9492 constitutes the proceedings of the 22nd International Conference on Neural Information Processing ICONIP 2015 held in Istanbul Turkey in November 2015 The 231 full papers presented were carefully reviewed and selected from 375 submissions The 4 volumes represent topical sections containing articles on Learning Algorithms and Classification Systems Artificial Intelligence and Neural Networks Theory Design and Applications Image and Signal Processing and Intelligent Social Networks Processing for Android Andrés Colubri,2017-11-02 Learn how to use the Processing programming language and environment to create Android applications with ease This book covers the basics of the Processing language allowing users to effectively program interactive graphics in 2D and 3D It also details the application of these techniques to different types of Android devices smartphones tablets wearables and smartwatches Processing for Android walks you through the steps of taking an initial idea to a final app With this book you will be able to

write engaging apps with interactive visuals driven by motion and location information obtained from the device's sensors including health data from the wearer like step count and heart rate. An advantage of Processing for Android over more complex programming environments is the ability for users to focus on the interactions and visual output of their code rather than in the implementation details of the Android platform. This book goes through a comprehensive series of hands-on projects ranging from simple sketches to more complex projects involving sensors and integration with larger apps. It also covers important aspects such as exporting your Processing projects as signed apps ready to upload to the Google Play store and be shared with the world. What You'll Learn: Write apps and live wallpapers for smartphones and tablets. Design and implement interactive watch faces. Create Virtual Reality experiences for Cardboard devices. Integrate Processing sketches into larger apps and Android Studio. Export projects as completed apps ready to distribute through Google Play Store. Who This Book Is For: Artists, designers, students, researchers, and hobbyists who are not necessarily Android experts but are looking to write mobile apps that make creative use of interactive graphics, sensor data, and virtual reality.
