High and Too Steep David B. Williams, 2015-09-01 Residents and visitors in today s Seattle would barely recognize the landscape that its founding settlers first encountered As the city grew its leaders and inhabitants dramatically altered its topography to accommodate their changing visions In *Too High and Too Steep* David B Williams uses his deep knowledge of Seattle scientific background and extensive research and interviews to illuminate the physical challenges and sometimes startling hubris of these large scale transformations from the filling in of the Duwamish tideflats to the massive regrading project that pared down Denny Hill In the course of telling this fascinating story Williams helps readers find visible traces of the city s former landscape and better understand Seattle as a place that has been radically reshaped Watch the trailer <https://www.youtube.com/watch?v=af51FU8hHLI> *Too High and Too Steep* was made possible in part by a grant from 4Culture s Heritage Program **The Role of Self and Adaptation in Learning and Development** Daniel Rodriguez, 2024-02-13 This

book introduces readers to Psychoadaptation a general model of change that stresses the importance of experiencing disequilibrium in the development of a healthy Self and applies it to a range of examples across the academic sport and health domains Built upon his studies of human development and learning Daniel Rodriguez offers an overview of a model of change with a specific focus on the development of Self and conceptions of Self The author begins by focusing on academic topics such as conducting research teaching and being a student before highlighting examples from sport and health With a clear and engaging tone each chapter highlights how the theory behind Psychoadaptation can be applied across a variety of contexts and in the modern world The result is a solid balance of scientific theory and practical application that readers can relate to their own circumstances and research Offering a unique conceptualization to development learning and behavior change this is a useful resource for students and scholars within these areas as well as clinicians working in the fields of health and sport It will also benefit individuals looking to embark upon their own journeys to Self development **Driver**
