How To Write A Dissertation Conclusion:

Completing Your Qualitative Dissertation Linda Dale Bloomberg, Marie Volpe, 2008-01-24 Completing your Qualitative Dissertation fills an important gap in the qualitative research literature by specifically addressing the fast growing practice of qualitative postgraduate dissertations in colleges and universities throughout the world. Many students struggle to complete qualitative research projects because the research itself is inherently messy. To address this challenge the authors have distilled decades of experience into a first of its kind highly practical reference for graduate students. At the heart of the book is a series of chapters that models the typical progression of a dissertation. Each chapter is illustrated by examples that give the reader an understanding of what the actual write up would look like. Emphasis throughout the book is on conceptual understanding as it relates to the practical aspects involved in navigating the dissertation process.

Writing a Built

Environment Dissertation Peter Farrell, 2011-01-13 As a built environment student you are likely to be required to research, write and submit a dissertation as a core component of your degree studies. As a vocational profession students of the built environment often have strong practical aspirations. Writing a Built Environment Dissertation provides practical guidance and will help to steer you into a position where you can develop a good dissertation by mixing your practical strengths with more theoretical tools. The book is ordered around a common dissertation structure that is it starts with material that should be in the introduction and finishes with material that should be in the conclusion. Each chapter provides a commentary on the kind of information that you should put in each chapter of your dissertation supported by a variety of examples using a range of methodological designs. The book has a strong focus on data collection, data analysis, reliability and validity all areas where student dissertations are often weak. Material that will help you think about study skills and ethics is embedded throughout the book and the chapters on qualitative and quantitative analysis will show you how to carry out a rigorous analysis while avoiding some of the complexity in statistical work. If you are an undergraduate student in the final year of an honours degree programme in the built environment or perhaps a student at masters or PhD level and have been away from academic study for some time then this book will help you to write a more innovative and thorough dissertation.
