

RESEARCH PROPOSAL SAMPLE

The chosen methods of a particular study would largely be shaped by the paradigm adhered to by the researcher. There are three dominant form of methods used by researchers to collect and analyze data of the issue that they want to conduct research on, which are qualitative, quantitative and mixed research methods. In the field of educational research, it is important to understand the distinctions between qualitative and quantitative research methods because scholars would claim that these methods are too different from each other, and their differences cannot be reconciled. Intuitively, the best research design is dependent on the topic being researched (Hycner, 1985). However, other factors would also shape the decision to use a specific research method. As said, the researcher's paradigm is one such factor, if not the most important factor. Another factor is the researcher's own experiences and preferences

Quantitative Method

Various studies have used the quantitative approach in assessing the use of simulation in medical education. For instance, Morgan and his colleagues performed a study evaluating the efficacy of simulated-based teaching against to videotape teaching through the use of performance based assessments as well as written examinations. The sample used by the researchers was 144 students out of 177 invited. Although the researchers did not exclude anyone in the recruitment process of participants, 33 of them excused themselves and this can have the potential of resulting in selection bias (Polit & Hungler, 1995). Polit and Hungler specifically conducted a quasi-experimental study design, which called for a pretest, posttest and randomization to treatment group. Using this quantitative type of study led to risks such as possible threats to internal validity such as history, maturation, selection, testing as well as instrumentation. In addition, this specific quantitative study was limited by not controlling for any threats to external validity, examples of which are the Hawthorne effect, novelty and experimenter.

How To Write A Good Proposal For A Research Paper:

Essentials of Scientific Writing Joseph Mugah, 2016-12-13 Essentials of Scientific Writing How to Write Effective Titles and Abstracts for Research Papers and Proposals is a belated entrant into a vast and crucially important area with scarce reference materials This scarcity manifested itself as I searched what I had expected would be useful source materials for the present book I skimmed through many textbooks on scientific writing and editing articles on the Internet and notes from courses on scientific writing They all turned out to be manifestly wanting in both depth and scope None extended beyond two pages and most were hardly a page long so they were largely useless for my purposes To the authors knowledge few published books treat the subjects of Titles and Abstracts in the kind of detail presented in this book Accordingly in developing the book the author hoped to fill a void in the crucial area of facilitating sharing of knowledge and information from research work It is my hope that everyone writing scientific work will endeavor to find space for the book on their shelves and will place it within arms length whenever they are writing or editing the title or abstract [How to Write and Publish a Scientific Paper](#) Robert A. Day, Barbara Gastel, 2012-06-07 An essential guide providing beginning scientists and experienced researchers with practical advice on writing about their work and getting published [How to Write and Publish a Scientific Paper](#) Barbara Gastel, Robert A. Day, 2022-06-30 Thoroughly updated throughout this classic practical text on how to write and publish a scientific paper takes its own advice to be as clear and simple as possible The purpose of scientific writing according to Barbara Gastel and Robert A Day is to communicate new scientific findings Science is simply too important to be communicated in anything other than words of certain meaning This clear beautifully written and often funny text is a must have for anyone who needs to communicate scientific information whether they re writing for a professor other scientists or the general public The thoughtfully revised 9th edition retains the most important material including preparing text and graphics publishing papers and other types of writing and plenty of information on writing style while adding up to date advice on copyright presenting online identifying authors creating visual abstracts and writing in English as a non native language A set of valuable appendixes provide ready reference including words and expressions to avoid SI prefixes a list of helpful websites and a glossary Students and working scientists will want to keep How to Write and Publish a Scientific Paper at their desks and refer to it at every stage of writing and publication *Research Proposals* Thomas E. Ogden, Israel A. Staying on Top in Academia Arne Pommerening,2021-06-25 The pace of change in academia is ever increasing which makes it difficult for anyone to stay up to date with what may be the right long term strategy or even the next step in mastering a PhD or to secure a fruitful academic career Academic mentoring has proved to be helpful to many young researchers in difficult situations and mentoring programmes have been launched at many universities In its most basic meaning mentoring is a goal oriented off line conversation between a more experienced mentor and a less experienced mentee person with the objective to empower the mentee to make important work related decisions The first chapter of the book offers an introduction to academic mentoring and provides an overview of what academic mentoring entails In the following chapters important topics are discussed that may come up in mentoring conversations These include scientific thinking doctoral studies behaviour and disappointments scientific storytelling teaching scientific presentations early career years research cooperation job applications and basic data management The discussions in each of these chapters were designed with a view to provide food for thought and to invite self reflection as well as continued discussions with peers and mentors The book is written in a highly accessible style whilst restricting each chapter to the most essential information so that reading them can be

accommodated in any busy schedule It is not limited to any particular university or geographic region since the author has worked in a number of different countries and encountered many different academic cultures The text is also a useful handbook and reference to go with mentoring programmes

Sources of Knowledge (Through Creative And Systematic Research Work) ,2025-08-15 Knowledge is a form of familiarity awareness understanding or acquaintance It often involves the possession of information learned through experience and can be understood as a cognitive success or an epistemic contact with reality like making a discovery Knowledge is often understood as a state of an individual person but it can also refer to a characteristic of a group of people as group knowledge social knowledge or collective knowledge Some social sciences understand knowledge as a broad social phenomenon that is similar to culture Knowledge is closely related to intelligence but intelligence is more about the ability to acquire process and apply information while knowledge concerns information and skills that a person already possess Knowledge can be produced in many ways The main source of empirical knowledge is perception which involves the usage of the senses to learn about the external world Introspection allows people to learn about their internal mental states and processes Other sources of knowledge include memory rational intuition inference and testimony According to foundationalism some of these sources are basic in that they can justify beliefs without depending on other mental states Coherentists reject this claim and contend that a sufficient degree of coherence among all the mental states of the believer is necessary for knowledge According to infinitism an infinite chain of beliefs is needed
