Information Display, 2008 *Wide Band Gap Semiconductor Nanowires 2* Vincent Consonni, Guy Feuillet, 2014-08-08 This book the second of two volumes describes heterostructures and optoelectronic devices made from GaN and ZnO nanowires Over the last decade the number of publications on GaN and ZnO nanowires has grown exponentially in particular for their potential optical applications in LEDs lasers UV detectors or solar cells So far such applications are still in their infancy which we analyze as being mostly due to a lack of understanding and control of the growth of nanowires and related heterostructures Furthermore dealing with two different but related semiconductors such as ZnO and GaN but also with different chemical and physical synthesis methods will bring valuable

comparisons in order to gain a general approach for the growth of wide band gap nanowires applied to optical devices

Exploring Arduino Jeremy Blum, 2013-07-16 Learn to easily build gadgets gizmos robots and more using Arduino Written by Arduino expert Jeremy Blum this unique book uses the popular Arduino microcontroller platform as an instrument to teach you about topics in electrical engineering programming and human computer interaction Whether you re a budding hobbyist or an engineer you ll benefit from the perfectly paced lessons that walk you through useful artistic and educational exercises that gradually get more advanced In addition to specific projects the book shares best practices in programming and design that you can apply to your own projects Code snippets and schematics will serve as a useful reference for future projects even after you ve mastered all the topics in the book Includes a number of projects that utilize different capabilities of the Arduino while interfacing with external hardware Features chapters that build upon each other tying in concepts from previous chapters to illustrate new ones Includes aspects that are accompanied by video tutorials and other multimedia content Covers electrical engineering and programming concepts interfacing with the world through analog and digital sensors communicating with a computer and other devices and internet connectivity Explains how to combine smaller topics into more complex projects Shares downloadable materials and source code for everything covered in the book Projects compatible with many official Arduino boards including Arduino Uno Arduino Leonardo Arduino Mega 2560 Arduino Due Arduino Nano Arduino Mega ADK LilyPad Arduino and may work with Arduino compatible boards such as Freeduino and new third party certified boards such as the Intel Galileo *Exploring Arduino* takes you on an adventure and provides you with exclusive access to materials not found anywhere else *Make: Technology on Your Time* Volume 25 Mark
