The Return of Theory in Early Modern

English Studies, Volume II P. Cefalu, G. Kuchar, B. Reynolds, 2014-10-14 This companion volume to *The Return of Theory in Early Modern English Studies* Tarrying with the Subjunctive exemplifies the new directions in which the field is going as well as the value of crossing disciplinary boundaries within and beyond the humanities Topics studied include posthumanism ecological studies and historical phenomenology Palgrave Handbook of Critical Posthumanism Stefan Herbrechter, Ivan Callus, Manuela Rossini, Marija Grech, Megen de Bruin-Molé, Christopher John Müller, 2022-11-28 Palgrave Handbook of Critical Posthumanism is a major reference work on the paradigm emerging from the challenges to humanism humanity and the human posed by the erosion of the traditional demarcations between the human and nonhuman This handbook surveys and speculates on the ways in which the posthumanist paradigm emerged transformed and might further develop across the humanities With its focus on the posthuman as a figure on posthumanism as a social discourse and on posthumanisation as an on going historical and ontological process the volume highlights the relationship between the humanities and sciences The essays engage with posthumanism in connection with subfields like the environmental humanities health humanities animal studies and disability studies The book also traces the historical representations and understanding of posthumanism across time Additionally the contributions address genre and forms such as autobiography games art film museums and topics such as climate change speciesism anthropocentrism and biopolitics to name a few This handbook considers posthumanism's impact across disciplines and areas of study **Posthumanity in the Anthropocene** Esther Muñoz-González, 2023-04-20 In this book Margaret Atwood's dystopian novels *The Handmaid's Tale* the *MaddAddam* trilogy *The Heart Goes Last* and *The Testaments* are analyzed from the perspective provided by the combined views of the construction of the posthuman subject in its interactions with science and technology and the Anthropocene as a cultural field of enquiry Posthumanist critical concerns try to dismantle anthropocentric notions of the human and defend the need for a closer relationship between humanity and the environment Supported by the exemplification of the generic characteristics of the cli fi genre this book discusses the effects of climate change at the individual level and as a collective threat that can lead to a world without us Moreover Margaret Atwood is herself the constant object of extensive academic interest and Posthuman theory is widely taught researched and explored in almost every intellectual field This book is aimed at worldwide readers not only those interested in Margaret Atwood's oeuvre but also those interested in the debate between critical posthumanism and transhumanism together with the ethical implications of living in the Anthropocene era regarding our daily lives and practices It will be especially attractive for academics university teachers postgraduates researchers and college students in general Inoperative Learning Tyson Lewis, 2017-10-16 *Inoperative Learning* embodies a weak philosophy of education It does not offer a set of solutions or guidelines for improving educational outcomes but rather renders taken for granted assumptions about the theory practice coupling inoperative By arguing that such logic reduces education to instrumental ends this book presents a challenge to contemporary notions of education as outcomesbased goal

directed learning From the perspective of learning the neutralization of progress growth and maturity would usually be seen as obstacles needing to be overcome on the path toward set goals Yet Lewis argues that a serious investigation of inoperativity opens up possibilities that would be otherwise unavailable in a world fixated on the question of learning In dialogue with philosophers Agamben Benjamin and Esposito authors Kafka and Walser and qualitative researchers Lather Lewis turns our collective attention to what remains when concepts such as learning child development teacher effectivity and personal growth are left idle Inoperative Learning presents a radical rewriting of educational possibilities It should therefore be of great interest to educational researchers and educational philosophers concerned with the question of alternative logics of education beyond learning The book may also be of interest to theorists in the critical humanities that are engaged in education as a thematic concern in their research and classroom practices

What if Culture was Nature all Along? Vicki Kirby, 2017-01-18 New materialisms argue for a more science friendly humanities ventilating questions about methodology and subject matter and the importance of the non human However these new sites of attention climate biology affect geology animals and objects tend to leverage their difference against language and the discursive Similarly questions about ontology have come to eclipse and even eschew those of epistemology While this collection of essays is in kinship with this radical shake up of how and what we study the aim is to re navigate what constitutes materiality These efforts are encapsulated by a rewriting of the Derridean axiom there is no outside text as there is no outside nature What if nature has always been literate numerate social And what happens to the human if its exceptional identity and status is conceded quantum non local and ecological implication

Immortal Passage Asher Seidel, 2010-10-11 Immortal Passage Philosophical Speculations on Posthuman Evolution is Asher Seidel's speculative account of posthuman evolution Seidel begins with the transitional period in which humans begin to live for significantly extended periods then moves to the closer future in which having transitioned the now posthumans enjoy enhanced cognitive and creative powers Finally Seidel enters the distant future where our descendants might possess abilities beyond the limits of what is presently conceivable Seidel's speculations engage various philosophical problems Seidel seeks an ethical theory that co develops with a deeper scientific understanding of ourselves He also examines the metaphysical and epistemological presuppositions of his recommendation for human to posthuman transitioning including mind body dualism vigorous enough to allow for full bodied consciousness but insufficient for freewill perceptual direct realism and self identity As the speculations reach further into the future various socio political questions regarding the difficulties of transitioning are explored Speculated possibilities of pain free living cooperative relationships nonbiological selfhood and radically enhanced cognitive abilities are examined in depth in this mind bending ride into the future of humankind

Plasticity and Education Kjetil Horn Hogstad, 2025-02-12 This book explores the engagement between the philosophical concept of plasticity and the radically changing space of educational thinking Plasticity is a central concept in the philosophy of Catherine Malabou It represents a new metaphor for the space

between the creation resistance and total dissolution of form Plasticity designates the most prominent feature of the human being the feature of shaping itself receiving shape from outside continually changing yet always indebted to its history Differing from the formlessness of flexibility the notion that form can change into anything without resistance or consequence plasticity represents a radical restructuring of our ideas of development and change According to plasticity the cause and space for change are found inside of form itself and form accumulates form over time In other words our biological body is both what changes and what causes change but whatever change happens gives shape to what is to come later In this way plasticity formulates a new relationship between body and soul matter and symbolism brain and thinking Their meeting space is represented metaphorically by the brain the plastic organ par excellence Highly pertinent to educators plasticity provides a new conceptualisation of the possibility of being and becoming This book rethinks some of the fundamental issues in philosophy of education among them power rationality subjectivity ideas of childhood of life itself truth and intelligence This book is a collection of a special issue of the journal Educational Philosophy and Theory and two new chapters

Risk and the English Novel Julia Hoydis, 2019-09-23 Taking the cue from the currency of risk in popular and interdisciplinary academic discourse this book explores the development of the English novel in relation to the emergence and institutionalization of risk from its origins in probability theory in the late seventeenth century to the global risk society in the twenty first century Focussing on 29 novels from Defoe to McEwan this book argues for the contemporaneity of the rise of risk and the novel and suggests that there is much to gain from reading the risk society from a diachronic literary cultural perspective Tracing changes and continuities the fictional case studies reveal the human preoccupation with safety and control of the future They show the struggle with uncertainties and the construction of individual or collective logics of risk which oscillate between rational calculation and emotion helplessness and denial and an enabling or destructive sense of adventure and danger Advancing the study of risk in fiction beyond the confinement to dystopian disaster narratives this book shows how topical notions such as chance and probability uncertainty and responsibility fears of decline and transgression all cluster around risk
