W. Knox, R. W. Eicher, 1976 **Report of the Chief of the Forest Service** United States. Forest Service, 1964 *Innovation and Market Value. The Case of Tourism Enterprises* Dawid Szutowski, 2017-03-18 In contemporary economics only one thing is constant constant change Gunday et al 2011 The notion of change relates directly to innovation The very nature of innovation constitutes combining existing factors in a new changed way Since the early stage of the scientific investigation of innovation research has focused mainly on the solutions actually implemented Schumpeter 1939 Yet it is only through implementation that the benefits of innovation may materialise The task is not simple The process of obtaining the gains is complex as innovation may pass through different stages Thus for almost half century the scientific community has considered innovation to be a complex process and not just a simple occurrence Myers and Marquis 1969 Innovation pushes progress forward Thus previous scientific investigation limited the concept of innovation to implementations which generate positive effects Nelson and Winter 1982 The above scientific considerations still hold today Moss Kanter 2006 Innovation is of crucial importance for tourism companies which cover accommodation for visitors food and beverage serving activities passenger transportation travel agencies and other reservation activities cultural activities sports and recreational activities and retail trade of country specific tourism characteristic goods UNWTO 2010 It provides them with competitive advantage and hence the firms with market power gain more from innovation Tirole 1995 A firm s

innovation interacts with the environment It delivers diverse benefits to the consumers in the form of new products and lower prices which in turn impact positively on the company Shiller 2006 In the context of tourism the ongoing scientific discussion on innovation seems not to have achieved any definite conclusions yet The implementation of innovation in tourism enterprises leads to the achievement of diverse ends From this point of view the measurement of the effects of innovation is of vital importance There are a number of financial measures covering substantially different fields The most comprehensive amongst them is a company's value It covers all the aspects of a company's activity Bodie and Merton 2000 However due to its importance and complexity numerous approaches to company value were created The basic distinction covers book and market value based approaches The proponents of book value assume that the balance sheet yields a reliable estimate of the value of assets and equities However numerous shortcomings emerge the static character dealing with historical figures failing to include intangibles and treating all classes of accounts as having equal importance Nunes 2003 The market value based approach stands for the price that assets would fetch in the marketplace Fabrozi and Drake 2009 The main objective of the research is to measure the short and long term impact of innovation announcements on the market value of equity of tourism enterprises

Gallouj,F. Djellal,2011-11-01 This book represents a significant step towards dealing with the lacuna constituted by the inadequacy of the literature on the services And as such it approaches its task from a variety of directions From the foreword by William J Baumol New York University US The Handbook of Innovation and Services is an exceptional volume Its contributors including Fa z Gallouj William Baumol Jean Gadrey and Pascal Petit are among the major thinkers in both the fields of the economics of services and the economics of innovation Selected topics include the cost disease services innovation in the global economy social innovation in the services and innovation and employment in services The book I am sure will become a standard reference volume in both these fields in the ensuing years Edward Wolff New York University US This Handbook brings together 49 international specialists to address an issue of increasing importance for the world's post industrial economies innovation as it relates to services Contemporary economies have two fundamental characteristics Firstly they are

service economies in as much as services account for more than 70 per cent of the wealth and jobs in most developed countries Secondly they are innovation economies as recent decades have seen an unprecedented development of scientific technological organisational and social innovations This Handbook expertly links these two major characteristics in order to investigate the role of innovation in services an issue that until now has been inadequately explored and one that poses many theoretical and operational challenges This comprehensive volume encompasses the views of eminent scholars from a range of disciplines including economics management sociology and geography and draws on a number of different analytical and methodological perspectives With its multi disciplinary approach this Handbook will be an invaluable reference source for academics and students in the fields of economics management and the geography of services and innovation Public authorities and managers in the service sector will also find this book fascinating
