Deji Badiru, 2024-06-19 This is a math mentoring book without the gory mathematical expressions. The intended purpose of this book is to allay the fear of mathematics that most people have. Math is actually a tame and fun ally in accomplishing a lot of things in life, such as investment, social networking, commerce, technology, engineering, and science. I encourage and spark the interest of young people, especially girls, to embrace Mathematics to their full potential. The inherent mathematical ability may be there, but the confidence and pathway to manifest and leverage the ability may not be known. One way to discover and elicit the underlying ability is through humor and cajoling, which is the purpose of this freeform book. *MATHEMATICS OF HEALING*
