1. Correct and proper use

Kampmann Plan radiant panels have been manufactured in accordance with state of the art engineering and recognised safety directives. However incorrect installation and commissioning or improper use of the units can nevertheless cause fatal injury or damage to the unit or other units or systems.

Kampmann radiant panels are only suitable for use indoors and should not be installed in damp or wet areas, such as swimming pools or in the open air. The units should not be allowed to become damp or wet during storage or installation. Any concerns or queries should be directed immediately to the manufacturer. The units are not suitable for any purpose other than those shown above. Damage resulting from improper use is the responsibility of the user. Correct and proper use also includes the implementation of the installation instructions given in this manual.

The installation of this unit requires technical knowledge of heating, cooling and ventilation and, whilst not a prerequisite, a technical qualification in one of these areas is recommended. Any damage resulting from improper installation is the responsibility of the installer.

2. Delivery / Storage

Kampmann Plan radiant panels are delivered on pallettes (diag. A). To prevent damage, such as bending of the units, whilst unloading, the pallettes should be lifted from underneath. The radiant panels are packaged unassembled, with one panel width per pallette (diag. B), for assembly on site.

They should be stored in a dry place as the packaging does not protect them from moisture.

3. Installation

Kampmann radiant panels can be connected either by pressing the steel pipes together using compression fittings or by welding the steel pipes together.

3.1 Installation using compression fittings

Fitting the suspension fixings:

- Read the section referring to suspension fixings on page 4, section 5.
- Determine the position of the fixings on the ceiling and fit ceiling plugs or trapeziform fixings.
- Fit the fixings into the ceiling approximating the final fixing height (noting at all times the minimum suspension height from the ceiling (see table 1)).
