Issues of Governance, Security, and Development in Contemporary Africa Mohamed Saliou Camara, Alem Hailu, Sabella O. Abidde, 2023-12-15 Governance security and development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason *Issues of Governance Security and Development in Contemporary Africa* offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development The Oxford Handbook of Kenyan Politics Nic Cheeseman, Karuti Kanyinga, Gabrielle Lynch, 2020-02-14 Kenya is one of the most politically dynamic and influential countries in sub Saharan Africa Today it is known in equal measure as a country that has experienced great highs and tragic lows In the 1960s and 1970s Kenya was seen as a success story of development in the periphery and also led the way in terms of democratic breakthroughs in 2010 when a new constitution devolved power and placed new constraints on the president However the country has also made international headlines for the kind of political instability that occurs when electoral violence is expressed along ethnic lines such as during the Kenya crisis of 2007 08 when over 1 000 people lost their lives and almost 700 000 were displaced The Oxford Handbook of Kenyan Politics explains these developments and many more drawing together 50 specially commissioned chapters by leading researchers The chapters they have contributed address a range of essential topics including the legacy of colonial rule ethnicity land politics devolution the constitution elections democracy foreign aid the informal economy civil society human rights the International Criminal Court the growing influence of China economic policy electoral violence and the impact of mobile phone technology In addition to covering some of the most important debates about Kenyan politics the volume provides an insightful overview of Kenyan history from 1930 to the present day and features a set of chapters that review the impact of devolution on regional politics in every part of the country **Radiology in Global Health** Daniel J. Mollura, Melissa P. Culp, Matthew P. Lungren, 2018-12-31 Exploring the question as to why more than half the world continues to have little or no access to medical imaging and radiology this important second edition fully revised and expanded offers not only answers but practical solutions providing new tools ideas and strategies for bringing vital radiology to low resource areas Based on RAD AID s ten

years of work 2008 2018 serving indigent communities around the world the book s interdisciplinary approach offers the synthesis of business management government policy formulation clinical methods and engineering in order to integrate economic development technology innovation clinical model planning educational strategies and public health measures The gold standard title in the field Radiology in Global Health 2nd Edition is intended for a broad audience including physicians especially radiologists and radiology residents radiology technologists radiology nurses sonographers hardware software engineers policy makers business leaders researchers and public health specialists at all levels who use or implement health care services for underserved populations In addition as health care providers use radiology in the process of clinical decision making this title is also designed for clinical physicians nurses nurse practitioners physician assistants and paramedical personnel Administrators and public health personnel will also be interested as the planning of radiology services for health care systems at both the facility level and at the population level requires a clear understanding of the technological challenges and management opportunities
