

GMD Trailed Disc Mowers

GMD 283 TG and 313 TG

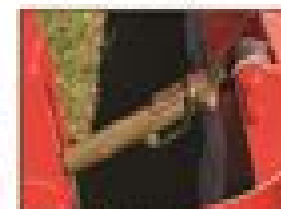

NEW TRAILED DISC MOWERS

The GMD 283 TG and GMD 313 TG trailed disc mowers are the clear choice for proven grass harvesting. These mowers feature a lower tractor horsepower requirement, easier attachment, and excellent stability compared to fully-mounted disc mowers. The new TG series machines are also a practical alternative to the mounted disc mower and "caddy" combinations. These new models offer the benefits of higher working rates, simple adjustments, and the proven KUHN 100 series disc cutterbar.

Superior Maneuverability

The Cygnus® solid link, available in double or two-point attachment, eliminates PTO chatter and minimizes tie-point wear and problems. Turns in excess of 90 degrees are possible providing exceptional maneuverability.

Easy Adjustments

Adjustments are fast and easy, and do not require tools. Both cutting height and suspension adjustments are uncomplicated and are conveniently located at single points.

MULTI-DISC DESIGN

Innovative KUHN Features

- A trailed mower design reduces the tractor size requirements when compared to fully-mounted disc mowers that act as the nose and rear foot/cass. Improved cuttable flexion results in less wrinkling and visible damage as well as reduced wear to cutterbar components.
- Compared to mounted disc mowers, transport height and tractor stability are no longer an issue.
- A turnability, with indicator, is used to adjust cutting height allowing tractor linkage adjustments.
- A guide wheel is mounted behind the disc row on both sides of the cutterbar to help form a perfect swath.

Advanced Suspension

The Proforma MP® suspension system quickly adapts to terrain changes. Should an obstacle be encountered the trailer moves up and back providing better protection to the cutterbar.

Cutterbar Protection

The PROFORMA MP® disc protection system normally protects the gear train should a major obstacle be struck in the field.
