H. Balfour Browne,2023-12-23 Reprint of the original first published in 1875 **The Dublin University Magazine** ,1874 Acute Religious Experiences Richard Saville-Smith,2023-02-09 This book engages the problem of how in the 21st century we are to speak about experiences of the extraordinary anomalous extreme which occur on a transhistorical and transcultural basis Critical re readings of seminal texts show how 20th century theoreticians in the humanities sought to erase madness from their irrational subjects This propensity to sanitize madness in the study of religions was mirrored by the instinct of psychiatrists to degrade religious experiences by reducing mad consciousness to psychosis or dissociation Richard Saville Smith introduces explanatory pluralism as a way of recognizing these disciplinary biases and mad studies as a way of negotiating this understanding The disproportionate significance of madness in shaping the fabric of the human story can then be recovered from both erasure and dismissal to be given the recognition previously denied as acute religious experiences Acute Religious Experiences divides into three sections beginning with re readings of William James s pathological programme Rudolf Otto s numinous T K Oesterreich s possession Mircea Eliade s shamanism Walter Stace s mysticism Walter Pahnke s psychedelic experience and Abraham Maslow s peak experiences These ideas are shown to constitute the beginnings of a fractured discourse on the irrational In part two contemporary psychiatry s Diagnostic and Statistical Manual DSM and Foucault s History of Madness are re read to reposition madness as not necessarily pathological This opens the way for the identification of acute religious experiences as a new holistic and post colonial approach through which religious data can be organized and addressed on a comparative basis In part three The Gospel of Mark is re read as a case study to demonstrate the novel insights which flow from the identification of acute religious experiences Richard Saville Smith draws on his own experiences of madness and his PhD from the School of Divinity at The University of Edinburgh to elucidate his research THE DUBLIN UNIVERSITY MAGAZINE. VOL. LXXXIV. NO. CCCCXCIX. JULY TO DECEMBER 1874. ,1874 **Rebekah's Closet** Amy Hoskins,2022-12-02 Rebekah s Closet is kind of memoir with wings and is based on a true story before it takes off into magical adventures The main character Rebekah finds herself in extremely difficult circumstances but transforms her life no matter what into a series of incredible journeys Her ultimate goal is not only to heal herself but to heal the troubled world through which she travels **The Resurrected Man** E.C. Repository ,1848 **Current List of Medical Literature** ,1946 Includes section Recent book acquisitions varies Recent United States publications formerly published separately by the U S Army Medical Library Responsible Brains William Hirstein,Katrina L. Sifferd,Tyler K. Fagan,2023-09-19 An examination of the relationship between the brain and culpability that offers a comprehensive neuroscientific theory of human responsibility When we praise blame punish or reward people for their actions we are holding them responsible for what they have done Common sense tells us that what makes human beings responsible has to do with their minds and in particular the relationship between their minds and their actions Yet the empirical connection is not necessarily obvious The guilty mind is a core concept of criminal law but if a defendant on trial for murder were found to have serious brain damage which brain parts or processes would have to be damaged for him to be considered not responsible or less responsible for the crime What mental illnesses would justify legal pleas of insanity In Responsible Brains philosophers William Hirstein Katrina Sifferd and Tyler Fagan examine recent developments in neuroscience that point to neural mechanisms of responsibility Drawing on this research they argue that evidence from neuroscience and cognitive science can illuminate and inform the nature of responsibility and agency They go on to offer a novel and comprehensive neuroscientific theory of human responsibility The authors core hypothesis is that responsibility is grounded in the brain s prefrontal executive processes which enable us to make plans shift attention inhibit actions and more The authors develop the executive theory of responsibility and discuss its implications for criminal law Their theory neatly bridges the folk psychological concepts of the law and neuroscientific findings **The Universalist and Ladies'**
