Industry 4.0 Solutions for Building Design and Construction Farzad Pour Rahimian, Jack Steven Goulding, Sepehr Abrishami, Saleh Seyedzadeh, Faris Elghaish, 2021-12-20 This book provides in depth results and case studies in innovation from actual work undertaken in collaboration with industry partners in Architecture Engineering and Construction AEC Scientific advances and innovative technologies in the sector are key to shaping the changes emerging as a result of Industry 4.0 Mainstream Building Information Management BIM is seen as a vehicle for addressing issues such as industry fragmentation value driven solutions decision making client engagement and design process flow however advanced simulation computer vision Internet of Things IoT blockchain machine learning deep learning and linked data all provide immense opportunities for dealing with these challenges and can provide evidenced based innovative solutions not seen before These technologies are perceived as the true enablers of future practice but only recently has the AEC sector recognised terms such as golden key and golden thread as part of BIM processes and workflows

This book builds on the success of a number of initiatives and projects by the authors which include seminal findings from the literature research and development and practice based solutions produced for industry. It presents these findings through real projects and case studies developed by the authors and reports on how these technologies made a real world impact. The chapters and cases in the book are developed around these overarching themes: BIM and AEC Design and Optimisation, Application of Artificial Intelligence in Design, BIM and XR as Advanced Visualisation and Simulation Tools, Design Informatics and Advancements in BIM, Authoring Green Building Assessment, Emerging Design Support Tools, Computer Vision and Image Processing for Expediting Project Management and Operations, Blockchain, Big Data and IoT for Facilitated Project Management, BIM Strategies and Leveraged Solutions. This book is a timely and relevant synthesis of a number of cogent subjects underpinning the paradigm shift needed for the AEC industry and is essential reading for all involved in the sector. It is particularly suited for use in Masters level programs in Architecture, Engineering and Construction.

Modularization Michael Kluck, Jin Ouk Choi, 2023-02-07. Modularization: A practical hands on guide to offsite preassembly beginning with the project as just a concept gleam in the CEO's eye and winding all the way through implementation at the construction site. Modularization is a philosophy change. And along with that change comes the need to understand the implementation requirements and project mindset adjustments that impact and influence all aspects of the modular project. To accomplish this, the book provides a complete from beginning to end identification and evaluation of the differences that make a modular project unique, starting with the very basics in terms of definitions and setting the groundwork of expectations by identifying benefits and challenges. Then, because the journey is as important as the destination, the reader is guided through the various project phases in a manner that reflects how they would be addressed in the workplace. From the very earliest identification of concepts through early assessment and selection of the optimal choice to be finally carried into detailed design, the reader is acquainted with each phase of the development process, including explanations and relevant suggestions for many of the questions and issues that typically come up. A perfect reference for professional and technical leaders when developing the early critical planning phases of modular projects, this guide offers useful examples and details on the fundamentals required to get a modular project started correctly and keep it on track. And for those whom this is not their first foray into modular project management, this guide includes suggestions, examples and/or lessons learned to make the subsequent module projects easier to implement. Recognized industry experts Michael Kluck and Dr Jin Ouk Choi have authored this guide to modularization that is ideal for owners, contractors, project management engineers, project controls and procurement. In fact, anyone interested in improving current construction project management practices. In addition, its thought provoking examples and project case studies provide the perfect platform for its instructional use in teaching modular concepts. Written from the perspective of both the Client/Owner and the EPC Contractor, this guide provides useful information needed for initial project management setup and technical details useful to working functional groups within the

project As such it is truly a universal guide that can provide personnel at all levels within the project with the information needed to make project implementation more seamless This book is written in terms of the large scale industrial modularization project but the steps and process are equally applicable to small scale projects and projects outside the industrial construction realm Some of the topics covered in this guide include The basics to set a basis for major topic presentations Module configurations good bad and ugly A deep dive into modularization business case Module team and project interactions Module execution planning and timing Success factors pitfalls and avoidance A walk through the module project A modular project case exercise tying it all together Standardization the next step What the future holds
