British Museum. Department of Printed Books,1911 **Subject Index of the Modern Works Added to the Library of the British Museum in the Years ...** British Museum,1911 Precision Agriculture for Sustainability and Environmental

Protection Margaret Oliver,Thomas Bishop,Ben Marchant,2013-11-20 Precision agriculture PA involves the application of technologies and agronomic principles to manage spatial and temporal variation associated with all aspects of agricultural production in order to improve crop performance and environmental quality The focus of this book is to introduce a non specialist audience to the the role of PA in food security environmental protection and sustainable use of natural resources as well as its economic benefits The technologies covered include yield monitors and remote sensing and the key agronomic principles addressed are the optimal delivery of fertilizers water and pesticides to crops only when and where these are required As a result it is shown that both food production and resource efficiency can be maximized without waste or damage to the environment such as can occur from excessive fertilizer or pesticide applications The authors of necessity describe some technicalities about PA but the overall aim is to introduce readers who are unfamiliar with PA to this very broad subject

and to demonstrate the potential impact of PA on the environment and economy Chapter 3 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 3.0 license
