innovative technology transfer      *Pandemia e agronegócio* Rob Wallace, 2020-09-07

Pandemia e agronegócio doenas infecciosas capitalismo e ciência de Rob Wallace defende que os novos vírus que há alguns anos amedrontam o planeta com epidemias e pandemias são sim uma criação dos seres humanos. Mas não estamos falando das teorias conspiratórias difundidas pelos robôs de Donald Trump ou Jair Bolsonaro que responsabilizam laboratórios chineses especializados em guerra biológica pela origem do novo coronavírus. Para o autor, esses microorganismos são o resultado da maneira como passamos a criar animais para consumo nos últimos quarenta anos. Quem já teve a oportunidade de ir a uma granja ou a uma fazenda de porcos sabe do que estamos falando: milhares de animais confinados muitas vezes impedidos de dormir e comendo 24 horas por dia para engordar e ir para o abate cada vez mais rápido. Para aumentar os lucros das empresas, claro, que se transformaram em grandes conglomerados. O número de animais criados para alimentar o crescimento quase duas vezes mais rápido que a população humana. Aves, vacas, porcos separados pelo produto a ser extraído: carne, ovos, leite em estabelecimentos onde compartilham a idade e o sistema biológico. E isso para a natureza, cuja lei mais importante é o equilíbrio na diversidade, significa uma praga gigante. Uma atração inevitável para outros animais: um banquete para microorganismos. Um experimento permanente de mutações e contágios extremos. Rob Wallace vem escrevendo sobre isso há quase vinte anos. Lançado pela primeira vez em 2015, *Pandemia e agronegócio* que agora chega ao Brasil graças à parceria da Elefante com a Igra Kniga reúne artigos do autor publicados desde 2007. Nos textos, o biólogo alerta sobre as origens da Sars, da gripe aviária e da gripe suína, alertando que se os seres humanos não modificassem a maneira como criam animais para abate, teriam que lidar no curto prazo com novas formas de vírus cada vez mais mortais. E aqui estamos. Os seres humanos construíram ambientes físicos e sociais em terra e no mar que alteraram radicalmente os caminhos pelos quais os patógenos evoluem e se dispersam. Os patógenos, no entanto, não são meros figurantes golpeados pelas mãos da história humana. Eles também agem por vontade própria, com o perigo do antropomorfismo. Demonstram agência, escreve Rob Wallace na introdução de *Pandemia e agronegócio*. Além do conteúdo integral da versão estadunidense, a edição brasileira traz os textos mais recentes do autor e de seus colaboradores sobre o atual surto de covid-19, a doença provocada pelo novo coronavírus Sars-CoV-2, que depois de aparecer na província de Hubei na China, se espalhou pelo planeta, colocando boa parte do mundo em quarentena e espalhando incertezas sobre a maneira como continuaremos vivendo e habitando a Terra. Os vírus surgidos em território chinês ali recebem imensa atenção de Rob Wallace no livro. Mas, longe de engrossar o coro da xenofobia que costuma vigorar nesse tipo de discussões, o autor vai às raízes do problema. Desde a década de 1970, a produção pecuária intensiva se espalhou pelo planeta a partir de suas origens nos Estados Unidos. Nosso mundo está cercado por cidades de monoprodução de milhares de porcos e aves apinhados lado a lado em uma ecologia quase perfeita para a evolução de várias cepas virulentas de influenza.
