Northern Lights Donald E. Abelson, 2016-11-01 Think tanks are often thought of as a uniquely US phenomenon Although the largest concentration of think tanks is in the United States they can be found in virtually every country Often overlooked Canada s think tanks represent a highly diverse and eclectic group of public policy organizations such as the Canadian Centre for Policy Alternatives the C D Howe Institute the Fraser Institute and the Mowat Centre among others In Northern Lights Donald Abelson explores the rise of think tanks in Canada and addresses many of the most commonly asked questions about how and under what circumstances they are able to affect public opinion and public policy He identifies the

ways in which Canadian think tanks often prioritize political advocacy over policy research and seeks to explain why these organizations are well suited and equipped to shape the discourse around key policy issues The first comprehensive examination of think tanks in Canada Northern Lights is both a primer for those looking to understand the role and function of think tanks in the policy making process and a guide to the leading policy institutes in the country *Advances in Cryptology - EUROCRYPT 2013* Thomas Johansson, Phong Q. Dariali: The 'Caspian Gates' in the Caucasus from Antiquity to the Age of the Huns and the Middle Ages Eberhard Sauer,2020-04-30 The Huns invading through Dariali Gorge on the modern day border between Russia and Georgia in AD 395 and 515 spread terror across the late antique world Was this the prelude to the apocalypse Prophecies foresaw a future Hunnic onslaught via the same mountain pass bringing about the end of the world Humanity s fate depended on a gated barrier deep in Europe s highest and most forbidding mountain chain Centuries before the emergence of such apocalyptic beliefs the gorge had reached world fame It was the target of a planned military expedition by the Emperor Nero Chained to the dramatic sheer cliffs framing the narrow passage the mythical fire thief Prometheus suffered severe punishment his liver devoured by an eagle It was known under multiple names most commonly the Caspian or Alan Gates Featuring in the works of literary giants no other mountain pass in the ancient and medieval world matches Dariali s fame Yet little was known about the materiality of this mythical place A team of archaeologists has now shed much new light on the major gorge blocking fort and a barrier wall on a steep rocky ridge further north The walls still standing today were built around the time of the first major Hunnic invasion in the late fourth century when the Caucasus defenses feature increasingly prominently in negotiations between the Great Powers of Persia and Rome In its endeavor to strongly fortify the strategic mountain pass through the Central Caucasus the workforce erased most traces of earlier occupation The Persian built bastion saw heavy occupation for 600 years Its multi faith medieval garrison controlled Trans Caucasian traffic Everyday objects and human remains reveal harsh living conditions and close connections to the Muslim South as well as the steppe world of the north The Caspian Gates explains how a highly strategic rock has played a pivotal role in world history from Classical Antiquity into the twentieth century **Media Ethics** Clifford G. Numerical Solution of

Time-Dependent Advection-Diffusion-Reaction Equations Willem Hundsdorfer, Jan G. Verwer, 2013-04-17 This book deals with numerical methods for solving partial differential equations PDEs coupling advection diffusion and reaction terms with a focus on time dependency A combined treatment is presented of methods for hyperbolic problems thereby emphasizing the one way wave equation methods for parabolic problems and methods for stiff and non stiff ordinary differential equations ODEs With regard to time dependency we have attempted to present the algorithms and the discussion of their properties for the three different types of differential equations in a unified way by using semi discretizations i.e. the method of lines whereby the PDE is transformed into an ODE by a suitable spatial discretization In addition for hyperbolic problems we also discuss discretizations that use information based on characteristics Due to this combination of methods this book differs substantially from more specialized textbooks that deal exclusively with numerical methods for either PDEs or ODEs We treat integration methods suitable for both classes of problems This combined treatment offers a clear advantage On the one hand in the field of numerical ODEs highly valuable methods and results exist which are of practical use for solving time dependent PDEs something which is often not fully exploited by numerical PDE researchers Although many problems can be solved by Euler's method or the Crank Nicolson method better alternatives are often available which can significantly reduce the computational effort needed to solve practical problems
