However this rush for development has been coupled with tremendous social and environmental change which although positive in some aspects has led to rising inequality and profound shifts in the condition ownership and management of natural resources High deforestation rates declining fish stocks biodiversity loss and alienation of indigenous and rural people from their land and traditional livelihoods are now matters of increasing local and international concern The book explores the social and political dimensions of these environmental changes in Cambodia and of efforts to intervene in and improve current trajectories for conservation and development It provides a compelling analysis of the connections between nature state and society pointing to the key role of grassroots and non state actors in shaping Cambodia s frontiers of change These insights will be of great interest to scholars of Southeast Asia and environment development issues in general Oil Booms and Business Busts Nimah Mazaheri,2016-05-02 Oil Booms and Business Busts looks at how government policymaking shapes a puzzling phenomenon in economic development the curse of natural resources It investigates how oil and mineral wealth shapes a government s policies toward the business environment entrepreneurs and innovative activities Other similar work either ignores the role of government policymaking in oil wealth treats it as another effect of the rentier state or dismisses it as illogical and incoherent One might expect that in light of such abundances governments would encourage entrepreneurship and new businesses to compete and grow in the market but Nimah Mazaheri shows that resource wealth instead incentivizes policymakers to focus on satisfying the interests of existing elites They more than oil poor nations institute barriers that impede the activities of domestic firms and entrepreneurs with the result being unimpressive economic performance over the past half century This is the first book to examine how oil wealth affects non elite actors who own the small and medium sized firms that absorb a majority of the economic and labor force of these countries Looking at two of the most important oil producing countries in the world Iran and Saudi Arabia the book provides an original theory about the factors that shape a logic of policymaking in oil producing states To extend his theory Mazaheri also looks at India which is one of the world s main coal producers He does this to show the effects of the gain and loss of a massive resource windfall on state policymaking toward the private sector Ultimately Mazaheri argues that such policymaking impedes the development of a middle class and therefore democratization a factor that can have overarching political repercussions for governmental stability **Business Statistics** ,1967 **Affordable Housing in the Urban Global South** Jan Bredenoord,Paul Van Lindert,Peer Smets,2014-06-05 The global increase in the number of slums calls for policies which improve the conditions of the urban poor sustainably This volume provides an extensive overview of current housing policies in Asia Africa and Latin America and presents the facts and trends of recent housing policies The chapters provide ideas and tools for pro poor interventions with respect to the provision of land for housing building materials labour participation and finance The book looks at the role of the various stakeholders involved in such interventions including national and local governments private sector organisations NGOs and Community based Organisations **Federal**
