D. Cronin, Judith Madden, Steven Enoch, David Roberts, 2013 The aim of this book is to provide the scientific background to using the formation of chemical categories or groups of molecules to allow for read across i e the prediction of toxicity from chemical structure It covers the scientific basis for this approach to toxicity prediction including the methods to group compounds structural analogues and or similarity mechanism of action and the tools to achieve this The approaches to perform read across within a chemical category are also described The book will provide concise practical guidance for those wishing to apply these methods in risk hazard assessment and will be illustrated with case studies Chemical Toxicity Prediction is the first book that addresses the concept of category formation and read across for toxicity prediction specifically This topic has really taken off in the past few years due to concerns over dealing with the REACH legislation and also due to the availability of the OECD Q SAR Toolbox Much lengthy and complex guidance is available on category formation e g from the OECD and to a lesser extent the European Chemicals Agency but

there is no one single source of information that covers all techniques in a concise user friendly format There is a real need for this information as in silico toxicology has come to the fore in recent years primarily as a result of the EU REACH legislation but also due to many other drivers e g reduction of animal testing Cosmetics regulation Category formation is seen as the only practical approach to make rational and transparent predictions for complex human toxicological endpoints The book covers all the areas required to create a robust category and perform read across Zookeeping Mark D. Irwin, John B. Stoner, Aaron M. Cobaugh, 2013-12-09 As species extinction environmental protection animal rights and workplace safety issues come to the fore zoos and aquariums need keepers who have the technical expertise and scientific knowledge to keep animals healthy educate the public and create regional national and global conservation and management communities This textbook offers a comprehensive and practical overview of the profession geared toward new animal keepers and anyone who needs a foundational account of the topics most important to the day to day care of zoo and aquarium animals The three editors all experienced in zoo animal care and management have put together a cohesive and broad ranging book that tackles each of its subjects carefully and thoroughly The contributions cover professional zookeeping evolution of zoos workplace safety animal management taxon specific animal husbandry animal behavior veterinary care public education and outreach and conservation science Using the newest techniques and research gathered from around the world Zookeeping is a progressive textbook that seeks to promote consistency and the highest standards within global zoo and aquarium operations **Cerebral Sphingolipidoses** Stanley M.
