Resources in Education ,1994-10 **Info Memo** ,1990 The Athenaeum ,1914 *The Amateur Hour* Jonathan Zimmerman,2020-10-27 The first full length history of college teaching in the United States from the nineteenth century to the present this book sheds new light on the ongoing tension between the modern scholarly ideal scientific objective and dispassionate and the inevitably subjective nature of day to day instruction American college teaching is in crisis or so we are told But we ve heard that complaint for the past 150 years as critics have denounced the poor quality of instruction in undergraduate classrooms Students daydream in gigantic lecture halls while a professor drones on or they meet with a teaching assistant for an hour of aimless discussion The modern university does not reward teaching so faculty members at every level neglect it in favor of research and publication In the first book length history of American college teaching Jonathan Zimmerman confirms but also contradicts these perennial complaints Drawing upon a wide range of previously unexamined sources *The Amateur Hour* shows how generations of undergraduates indicted the weak instruction they received But Zimmerman also chronicles institutional efforts to improve it especially by making teaching more personal As higher education grew into a gigantic industry he writes American colleges and universities introduced small group activities and other reforms designed to counter the anonymity of mass instruction They also experimented with new technologies like television and computers which promised to personalize teaching by tailoring it to the individual interests and abilities of each student But Zimmerman reveals the emphasis on the personal inhibited the professionalization of college teaching which remains ultimately an amateur enterprise The more that Americans treated teaching as a highly personal endeavor dependent on the idiosyncrasies of the instructor the less they could develop shared standards for it Nor have they rigorously documented college instruction a highly public activity which has taken place mostly in private Pushing open the classroom door *The Amateur Hour* illuminates American college teaching and frames a fresh case for restoring intimate learning communities especially for America s least privileged students Anyone who wants to change college teaching will have to start here **The Damned Don't Cry - They Just Disappear** Harlan Greene,2017-12-29 A biography of an unconventional Southern writer who illuminated gay life in the South In *The Damned Don t Cry They Just Disappear* literary historian and Lambda Award winning novelist Harlan Greene has created a portrait of a nearly forgotten southern writer unearthing information from archives rare books film libraries and small town newspapers Greene brings Harry Hervey 1900 1951 to life and explicates his works to reveal him as a hardworking writer and master of many genres bravely unwilling to conform to conventional values As Greene illustrates Hervey s novels short stories nonfiction books and film scripts contain complex mixtures of history and thinly disguised homoerotic situations and themes They blend local color naturalism melodrama and psychological and sexual truths that provide a view to the circles in which he moved Living openly with his male lover in Savannah Georgia and Charleston South Carolina Hervey set novels in these cities that scandalized the locals and critics as

well He challenged the sexual mores of his day sometimes subtly and at other times brazenly presenting texts that told one story to gay male readers while still courting a mainstream audience His novels and nonfiction may have been coded and thus escaped detection in their day but twenty first century readers can decipher them easily Greene also discusses Hervey s travel books and successful Hollywood scriptwriting as well as his use of exotic elements from Asian cultures The iconic film Shanghai Express starring Marlene Dietrich was based on one of his original stories He also wrote some of the first travel books on Indochina with descriptions of male and female prostitution and allusions to his own sexual adventures which still make for sensational reading today Despite Hervey s output and his perseverance in presenting gay characters and themes as openly as he could he has not been included in any survey of twentieth century gay writers Greene now rectifies this omission providing the first book length study of Hervey s life and work and the first scholarly attention to him in more than fifty years It furthers our understanding of gay life in the South as well as the impact of gay artists on popular culture in the first half of the twentieth century

Engineering; an Illustrated Weekly Journal ,1918 **An African American Dilemma** Zoë Burkholder,2021-07-11 An African American Dilemma offers the first social history of northern Black debates over school integration versus separation from the 1840s to the present Since Brown v Board of Education in 1954 Americans have viewed school integration as a central tenet of the Black civil rights movement Yet school integration was not the only or even always the dominant civil rights strategy At times African Americans also fought for separate Black controlled schools dedicated to racial uplift and community empowerment An African American Dilemma offers a social history of these debates within northern Black communities from the 1840s to the present Drawing on sources including the Black press school board records social science studies the papers of civil rights activists and court cases it reveals that northern Black communities urban and suburban vacillated between a preference for either school integration or separation during specific eras Yet there

was never a consensus It also highlights the chorus of dissent debate and counter narratives that pushed families to consider a fuller range of educational reforms A sweeping historical analysis that covers the entire history of public education in the North this work complicates our understanding of school integration by highlighting the diverse perspectives of Black students parents teachers and community leaders all committed to improving public education It finds that Black school integrationists and separatists have worked together in a dynamic tension that fueled effective strategies for educational reform and the Black civil rights movement a discussion that continues to be highly charged in present day schooling choices

many years in the making entitled *Religion in Human Evolution* and published by HUP when Bellah was 84 was a capstone to an extraordinary scholarly and intellectual career. It has been reprinted numerous times and continues to sell. In this book Matteo Bortolini recounts not just the arc of this extraordinary scholarly career but also an eventful and tempestuous life including a youthful student affiliation with the Communist Party USA and a resulting McCarthy era exile to Canada, crushing personal tragedies with the death of two of his four daughters in the 1970s and at the age of 50 coming out as a gay man which did not however sever his close ties with his wife of many decades, Melanie Hyman Bellah. The author has worked on this book for thirteen years and during this time has conducted research at university archives around the world including archives at Harvard, Columbia, Chicago, Berkeley, and McGill. Bortolini also interviewed some three dozen of Bellah's colleagues, former students, friends, and relatives, including his two daughters, who have given this project their full support without attempting to influence it in any way. They have also given the author full access to Bellah's personal papers. Bellah's wife of many years predeceased him. It is also noteworthy that when the obits appeared after Bellah's death, Bortolini was quoted in them as Bellah's biographer. So he is already widely recognized as the guy from whom we can expect a definitive biography of this man.

Daniel, United States. Office of Education, Floyd B. Jenks, Robert Herring Wright, 1913 Monthly Catalog of United States Government Publications, 1995 **Federal Register**, 2004 Debating Modern Medical Technologies Karen J. Maschke, Michael K. Gusmano, 2018-09-14. This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors. Medical technologies often promise to extend and improve quality of life but come with many questions. Are they safe and effective? Are they worth the cost? When should they be allowed on the market and when should Medicare, Medicaid, and private insurance companies be required to pay for drugs, devices, and diagnostic tests? Using case studies of disputes about the value of mammography, screening, genetic testing for disease risk, brain imaging technologies to detect biomarkers associated with Alzheimer's disease, cell-based therapies, and new expensive drugs, Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies, physicians, and patient advocates. *Debating Modern Medical Technologies: The Politics of Safety, Effectiveness, and Patient Access* reveals stakeholders differing values and interests regarding patient choice, physician autonomy, risk assessment, government intervention in medicine and technology, assessment and scientific innovation as a driver of national and global economies. It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients.
