Imperatives for Legal Education Research Ben Golder, Marina Nehme, Alex Steel, Prue Vines, 2019-08-28. In the last few decades university teaching has been recognised as an activity which can be studied and improved through educational scholarship. In some disciplines this is now well established. It remains emergent in legal education. The field is rich with questions to be answered, issues to be raised. This book provides the first overall review of legal education scholarship. The chapters outline the history of legal education research and provide a detailed analysis of the trends in areas of publication. Beyond this, the book suggests a typology for further conceptualising the field and a series of suggested paths for future research. The book originated from the 2017 UNSW conference Research in Legal Education: State of the Art. It features internationally respected authors who bring their perspectives on how legal education as a field of research should be conceptualised. The collection is arranged into three themes. First, a historical view is taken of the emergence of legal education scholarship and its roots that predate modern educational theory. Secondly, the book provides overviews of the extant field of publications, highlighting areas of interest and neglect and delineating the trends in current publication. Thirdly, the book provides a set of suggested typologies for describing legal education research and a series of essays for future directions which both critique current approaches and provide inspiration for future directions. The State of Legal Education Research represents an authoritative introduction to the field, a set of conceptual tools with which to describe it and inspiration for researchers to expand and grow research into legal education. **Nuclear Science Abstracts**, 1972

Planting the Anthropocene Jennifer Clary-Lemon, 2019-03-15. Planting the Anthropocene is a rhetorical look into the world of industrial tree planting in Canada that engages the themes of nature, culture and environmental change. Bringing together the work of material ecocriticism and critical affect studies in service of a new materialist environmental rhetoric. Planting

the Anthropocene forwards a frame that can be used to work through complex scenes of anthropogenic labor Using the results of interviews with seasonal Canadian tree planters Jennifer Clary Lemon interrogates the complex and messy imbrication of nature culture through the inadequate terminology used to describe the actual circumstances of the planters work and lives and offers alternative ways to conceptualize them Although silvicultural workers do engage with the limiting rhetoric of efficiency and humanism they also make rhetorical choices that break down the nature culture divide and orient them on a continuum that blurs the boundaries between the given and the constructed the human and nonhuman Tree planting work is approached as a site of a deep seated materiality a continued re creation of the land s disturbance rather than a simplistic form of doing good that further separates humans from landscapes Jennifer Clary Lemon s view of nature and the Anthropocene through the lens of material rhetorical studies is thoroughly original and will be of great interest to students and scholars of rhetoric and composition especially those focused on the environment
