Underdog Entrepreneurs Horatio M. Morgan, 2019-09-09

Entrepreneurship is challenging whatever your background in the current science and technology driven Western world. However, unlike traditionally dominant native born white male entrepreneurs in Silicon Valley and elsewhere, those who face greater hurdles blocking their path to success primarily come from marginalized and minority groups, both real and self-perceived, including immigrants, refugees, women, blacks, Hispanics, and Asians. Despite their potential to innovate and add value in the global marketplace, they persistently struggle or fail because they lack the requisite code-breaking skills. This book helps these underdog entrepreneurs acquire those skills with actionable advice to achieve and sustain success. It proposes a framework that pinpoints what the author calls the outsider problem: that is, situations in which individuals are primarily disadvantaged because they lack access to networks that facilitate superior learning and performance outcomes. He completes the framework by incorporating personal qualities and strategies that can solve this problem. Along the way, Morgan distills insights and evidence from multiple fields combined with a fresh look at the familiar stories of initially marginalized business leaders such as Indra Nooyi, Jack Ma, Hilary Devey, and Mike Lazaridis. He also shares the less known but equally inspiring stories of others. This book will help readers thrive while transcending their underdog status. **From**

Cabin 'Boys' to Captains Jo Stanley, 2016-04-04. Traditionally, a woman's place was never on stormy seas. But actually, thousands of dancers, purserettes, doctors, stewardesses, captains, and conductresses have taken to the waves on everything from floating palaces to battered windjammers. Their daring story is barely known even by today's seawomen. From before the 1750s, women fancying an oceangoing life had either to disguise themselves as cabin boys or acquire a co-operative husband with a ship attached. Early pioneers faced superstition and discrimination in the briny monasteries. Today, women captain cruise ships as big as towns and work at the highest level in the global maritime industry. This comprehensive exploration looks at the Merchant Navy, comparing it to the Royal Navy, in which Wrens only began sailing in 1991. Using a wide variety of interviews and sources, Jo Stanley vividly reveals the incredible journey across time taken by these brave and lively women. **salts**

The Routledge Handbook of Environmental Justice Ryan Holifield, Jayajit Chakraborty, Gordon Walker, 2017-09-14. The Routledge Handbook of Environmental Justice presents an extensive and cutting-edge introduction to the diverse, rapidly growing body of research on pressing issues of environmental justice and injustice. With wide-ranging discussion of current debates, controversies, and questions in the history, theory, and methods of environmental justice research contributed by over 90 leading social scientists, natural scientists, humanists, and scholars from professional disciplines from six continents, it is an essential resource both for newcomers to this research and for experienced scholars and practitioners. The chapters of this volume examine the roots of environmental justice, lay out and assess key theories and approaches, and consider the many different substantive issues that have been the subject of activism, empirical research, and policy development throughout the world. The Handbook features critical reviews of quantitative, qualitative, and mixed methodological approaches and explicitly addresses interdisciplinarity, transdisciplinarity, and engaged research.

Instead of adopting a narrow regional focus it tackles substantive issues and presents perspectives from political and cultural systems across the world as well as addressing activism for environmental justice at the global scale Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research policy and practice Providing detailed but accessible overviews of the complex varied dimensions of environmental justice and injustice the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists

Sex and Gender Factors Affecting Metabolic Homeostasis, Diabetes and Obesity Franck Mauvais-Jarvis, 2017-12-08 The book provides a

reference for years to come written by world renowned expert investigators studying sex differences the role of sex hormones the systems biology of sex and the genetic contribution of sex chromosomes to metabolic homeostasis and diseases In this volume leaders of the pharmaceutical industry present their views on sex specific drug discovery Many of the authors presented at the Keystone Symposium on Sex and gender factors affecting metabolic homeostasis diabetes and obesity to be held in March 2017 in Lake Tahoe CA This book will generate new knowledge and ideas on the importance of gender biology and medicine from a molecular standpoint to the population level and to provide the methods to study them It is intended to be a catalyst leading to gender specific treatments of metabolic diseases There are fundamental aspects of metabolic homeostasis that are regulated differently in males and females and influence both the development of diabetes and obesity and the response to pharmacological intervention Still most preclinical researchers avoid studying female rodents due to the added complexity of research plans The consequence is a generation of data that risks being relevant to only half of the population This is a timely moment to publish a book on sex differences in diseases as NIH leadership has asked scientists to consider sex as a biological variable in preclinical research to ensure that women get the same benefit of medical research as men

it relates to health What she uncovered will change the way you think about processed food frozen dinners breakfast cereals packaged snacks dips flavoured drinks bottled sauces and the industry that is profiting from the commodification and toxication of our food supply Stephen shows us how Big Food is picking up where Big Tobacco left off employing skilful marketing to nudge us towards increasingly processed food while hoping we ll fail to notice the commensurate rise in obesity and decline in health Stephen reveals how governments and peak health bodies are often powerless to intervene and even worse are sometimes complicit in convincing us to ditch our wholefood ingredients for factory made products This is not a diet book Meticulously researched and compellingly argued Eating Ourselves Sick shines a light on the powerful forces that stand between us and a healthy diet Guarding Human Health Abbas Kadkhodayan Ph.D.,2024-04-29 In our modern era numerous environmental factors are affecting our health and longevity such as food contaminated with all kinds of xenobiotic chemicals environmental pollution loss of biodiversity agricultural and food system type of nutrition as well as rise of various non communicable diseases Diseases like cardiovascular disease certain cancers type 2 diabetes and cognitive disorders like dementia and Alzheimer s and in particular the current obesity crisis Never in the history of humankind has obesity increased with such an unprecedented and alarming rate only in the last several decades not only in the United States but around the globe The current obesity pandemic is a human health tragedy Its negative effects result in loss of productivity a tremendous strain on our healthcare system that is not sustainable and loss of human life Today s children may be the first generation to not outlive their parents Many believe that obesity is the result of purely personal choices and personal responsibility and thus the advice has been to eat less move more or to take less calories and avoid poor lifestyle choices None of these pieces of advice take into consideration the overwhelming effect of various environmental factors as well as societal influences on our health many outside of our individual control Currently our food is extremely contaminated with xenobiotics the air we breathe the soil that we cultivate for food and the groundwater is heavily polluted Basically almost no place on earth remains pristine The current situation threatens human and ecosystem health in many regions around the globe At this juncture humans need to wise up quickly to prevent any catastrophic consequences ICGR 2019 2nd International Conference on Gender Research Prof. Paola Paoloni,Prof. Mauro Paoloni,Prof. Simona Arduini,2019-04-11
