2015 Passenger Car and 2014 Concept Car Yearbook Automotive Engineering International, 2014-11-21. Every year, global automakers introduce new or significantly re-engineered passenger vehicles with increasingly advanced technology intended to exceed consumer expectations and satisfy increasingly stringent government regulations. Some of these technologies are firsts of their kind and start trends that other automakers soon follow with the innovations becoming adopted across the board. The supply community is also increasingly playing a more significant role in helping the original equipment manufacturers research, develop and introduce the latest engineering innovations that help bring competitive advantage for their automaker partners. Each year, the editors of SAE's Automotive Engineering magazine publish many articles focused on the technology and engineering innovations of new passenger and concept vehicles, and these articles have been collected into this volume. This 2015 Passenger Car and 2014 Concept Car Yearbook is the fourth in an ongoing series of books that provide yearly snapshots of the latest and greatest technologies introduced by the automotive industry. In this book, we explore from an OEM and supplier perspective the newest and most technically interesting production vehicles released for the 2015 model year. In addition, we also have included a technology-focused recap of the concept cars revealed during 2014. Readers will have in one publication a complete overview of the key advances that took place over the course of the year from around the world. Each new model is profiled in its own chapter with one or more articles by the award-winning editors and contributors of Automotive Engineering in this exclusive compilation of print and online content. The novel engineering aspects of each new vehicle are explored with exclusive interviews of key engineers and product developers, providing insights you can only get from Automotive Engineering. This book is published for the most technically minded enthusiasts who are interested in new car technologies as well as practicing automotive engineers who are interested in new engineering trends. Engineering trends explored focus on what engineers are doing to meet the sometimes conflicting consumer and governmental demands for improved vehicle fuel efficiency, performance, safety and comfort. In short, this book provides a single source for information on the key engineering trends of the year from both automaker and supplier perspectives. Allows the reader to skip to chapters that cover specific car models that interest them or read about all models from beginning to end. Makes for dynamic book reading with its large number of

big full color images and easy reading magazine format      Corvette Racing David Kimble, 2013-01-25 Chevy's Corvette is without question one of the most recognized sports cars in the world. Since its introduction at GM's Motorama, Corvettes have been favorites for fans and drivers in a wide variety of racing venues including endurance events, hillclimbs, Trans Am drag racing, and GT Racing. For six decades, Corvettes have battled and defeated some of the biggest names in the sports car world: Ferrari, Porsche, Cobra, Jaguar, at storied road courses like Le Mans, Daytona, the Nürburgring, Sebring, and Laguna Seca. Beginning with the Real McCoy, a Zora Arkus-Duntov special raced at Sebring in 1956, this book draws on the history of factory-sponsored and private racing efforts, chronicling the history of the various Vettes that have been put to the test as racing machines. Noted automotive writer and renowned artist David Kimble delves deep into Vette's on-track history to provide the most thorough Corvette racing history ever published. Corvette Racing is illustrated with rare images from GM's media and design archives and complemented by Kimble's own stunning cutaway artwork. For Corvette and racing fans, this book is the definitive word on Corvette's nearly 60 years of competition.      **The Autocar**, 1988-06      *Government Reports Annual Index*, 1986      Trade and Industry, 1975
