Nabh Standards For Hospitals 3rd Edition November 2011:

Healthcare Systems Management: Methodologies and Applications Pradip Kumar Ray, Jhareswar Maiti, 2017-09-06 This edited volume focuses on research conducted in the area of healthcare systems management. Chapters are extensions of works presented at the International Conference on Management of Ergonomic Design, Industrial Safety and Healthcare Systems. The book addresses the need to have the knowledge of technological and resource management, clinical performances and quality of healthcare delivery systems in order to make hospital systems well and adequately designed and operationally effective, ensuring the quality of healthcare to patients. It is a useful resource for students, researchers, industrial professionals and design engineers.

Disease Control Priorities, Third Edition (Volume 3) Hellen Gelband, Prabhat Jha, Rengaswamy Sankaranarayanan, Susan Horton, 2015-10-29 Volume 3 Cancer presents the complex patterns of cancer incidence and death around the world and evidence on effective and cost-effective ways to control cancers. The DCP3 evaluation of cancer will indicate where cancer treatment is ineffective and wasteful and offer alternative cancer care packages that are cost-effective and suited to low resource settings. Main messages from the volume include: Quality matters in all aspects of cancer treatment and palliation; Cancer registries that track incidence, mortality and survival paired with systems to capture causes of death are important to understanding the national cancer burden and the effect of interventions over time; Effective interventions exist at a range of prices; Adopting resource-appropriate measures which allow the most effective treatment for the greatest number of people will be advantageous to countries; Prioritizing resources toward early stage and curable cancers is likely to have the greatest health impact in low income settings; Research prioritization is no longer just a global responsibility; Providing cancer treatment requires adequate numbers of trained healthcare professionals and infrastructure beyond what is available in most LMICs especially low income countries; Careful patient monitoring is a requirement of good quality cancer care and this often involves laboratory tests in addition to clinical examination. Even if financing were immediately available to build or expand a cancer control system, reaching capacity will take many years.
