Science Education in Context Richard K. Coll, Neil Taylor, 2019-02-18 This book presents an international perspective of the influence of educational context on science education. The focus is on the interactions between curriculum development and implementation particularly in non Western and non English speaking contexts i.e. outside the UK USA Australia NZ etc. An important and distinguishing feature of the book is that it draws upon the experiences and research from local experts from an extremely diverse cohort across the world 26 countries in total. The book addresses topics such as curriculum development research or evaluation of an implemented curriculum discussion of pressures driving curriculum reform or implementation of new curricula e.g. technology or environmental education the influence of political cultural societal or religious mores on education governmental or ministerial drives for curriculum reform economic or other pressures driving curriculum reform the influence of external assessment regimes on curriculum and so on. **Democracy and Education in**

Namibia and Beyond Amukugo, Elizabeth M., 2017-07-19 The Namibian constitution makes full provision for education as a fundamental human right and freedom. Three years into independence as part of the government's educational policy the Education for All Policy was launched as a stepping stone to free quality education. However inequities have become widely pronounced within the Namibian educational system. *Democracy and Education in Namibia and beyond* debates the education democracy nexus in Namibia and the southern African context. It defines and explores the meaning of democracy and related concepts. It also looks at what democracy means in the context of human rights and access to education. The ten chapters in this collection interrogate the strengths and limitations of education as an instrument of social change and question whether or not the Namibian educational objectives and practices do develop and help to sustain a democratic culture in Namibia. The authors in the collection have drawn material from their own teaching and research experience across the fields of education and social science in Namibia and beyond and present their findings in a pedagogical framework suitable as a challenging text for tertiary students. At a time when education is in crisis especially in South Africa where strident calls for free tertiary education and Africanisation of the curriculum are spreading like wildfire this book gives scholarly insight into the history and social conditions that gave rise to our current predicament. **Annex (ii) Namibia.**
