Narratologies New Perspectives On Narrative:

Narratologies David Herman,1999 **The Cambridge Companion to Narrative** David Herman,2007-07-19 The Cambridge Companion to Narrative provides a unique and valuable overview of current approaches to narrative study An international team of experts explores ideas of storytelling and methods of narrative analysis as they have emerged across diverse traditions of inquiry and in connection with a variety of media from film and television to storytelling in the real life contexts of face to face interaction to literary fiction Each chapter presents a survey of scholarly approaches to topics such as character dialogue genre or language shows how those approaches can be brought to bear on a relatively well known illustrative example and indicates directions for further research Featuring a chapter reviewing definitions of narrative a glossary of key terms and a comprehensive index this is an essential resource for both students and scholars in many fields including language and literature composition and rhetoric creative writing jurisprudence communication and media studies and the social sciences **New Perspectives on Narrative and Multimodality** Ruth Page,2009-09-10 This study investigates the richly diverse but integrated semiotic potential of storytelling Unlike other interdisciplinary approaches to narrative studies which have privileged the study of words in storytelling this unique collection provides a much needed analysis of how narrative operates using combinations of visual typographic aural gestural and haptic resources Although both multimodal theory and narrative studies have been invigorated by a variety of theoretical approaches this volume seeks to avoid a single dominant paradigm Instead the contributors use literary criticism linguistics and new media frameworks in a series of critical studies that are directly engaged with a range of multimodal stories The contributors analyze works that include oral accounts of personal experience opera cartoons print literature and new media forms of storytelling such as experimental digital fiction and fanfiction **Narrative Across Media** Marie-Laure Ryan,James Ruppert,John W. Bernet,2004-01-01 Narratology has been conceived from its earliest days as a project that transcends disciplines and media The essays gathered here address the question of how narrative migrates mutates and creates meaning as it is expressed across various media Dividing the inquiry into five areas face to face narrative still pictures moving pictures music and digital media Narrative across Media investigates how the intrinsic properties of the supporting medium shape the form of narrative and affect the narrative experience Unlike other interdisciplinary approaches to narrative studies all of which have tended to concentrate on narrative across language supported fields this unique collection provides a much needed analysis of how narrative operates when expressed through visual gestural electronic and musical means In doing so the collection redefines the act of storytelling Although the fields of media and narrative studies have been invigorated by a variety of theoretical approaches this volume seeks to avoid a dominant theoretical bias by providing instead a collection of concrete studies that inspire a direct look at texts rather than relying on a particular theory of interpretation A contribution to both narrative and media studies Narrative across Media is the first attempt to bridge the two disciplines **Handbook of Narrative Analysis**

Luc Herman, Bart Vervaeck, 2019-12-01 Stories are everywhere from fiction across media to politics and personal identity Handbook of Narrative Analysis sorts out both traditional and recent narrative theories providing the necessary skills to interpret any story In addition to discussing classical theorists such as Gérard Genette, Mieke Bal and Seymour Chatman Handbook of Narrative Analysis presents precursors such as E M Forster related theorists Franz Stanzel Dorrit Cohn and a large variety of postclassical critics Among the latter particular attention is paid to rhetorical cognitive and cultural approaches intermediality storyworlds gender theory and natural and unnatural narratology Not content to consider theory as an end in itself Luc Herman and Bart Vervaeck use two short stories and a graphic narrative by contemporary authors as touchstones to illustrate each approach to narrative In doing so they illuminate the practical implications of theoretical preferences and the ideological leanings underlying them Marginal glosses guide the reader through discussions of theoretical issues and an extensive bibliography points readers to the most current publications in the field Written in an accessible style this handbook combines a comprehensive treatment of its subject with a user friendly format appropriate for specialists and nonspecialists alike Handbook of Narrative Analysis is the go to book for understanding and interpreting narrative This new edition revises and extends the first edition to describe and apply the last fifteen years of cutting edge scholarship in the field of narrative theory

Audionarratology Jarmila Mildorf, Till Kinzel, 2016-04-25 Audionarratology is a new postclassical narratology that explores interfaces of sound voice music and narrative in different media and across disciplinary boundaries Drawing on sound studies and transmedial narratology audionarratology combines concepts from both while also offering fresh insights Sound studies investigate sound in its various manifestations from disciplinary angles as varied as anthropology history sociology acoustics articulatory phonetics musicology or sound psychology Still a specifically narrative focus is often missing Narratology has broadened its scope to look at narratives from transdisciplinary and transmedial perspectives However there is a bias towards visual or audio visual media such as comics and graphic novels film TV hyperfiction and pictorial art The aim of this book is to foreground the oral and aural sides of storytelling asking how sound voice and music support narrative structure or even assume narrative functions in their own right It brings together cutting edge research on forms of sound narration hitherto neglected in narratology radio plays audiobooks audio guides mobile phone theatre performance poetry concept albums digital stories computer games songs

Beyond Narrative Coherence Matti Hyvärinen, Lars-Christer Hydén, Marja Saarenheimo, Maria Tamboukou, 2010-01-13 Beyond Narrative Coherence reconsiders the way we understand and work with narratives Even though narrators tend to strive for coherence they also add complexity challenge canonical scripts and survey lives by telling highly perplexing and contradictory stories Many narratives remain incomplete ambiguous and contradictory Obvious coherence cannot be the sole moral standard the only perspective of reading or the criterion for selecting and discarding research material Beyond Narrative Coherence addresses the limits and aspects of narrative dis coherence by offering a rich theoretical and historical background to the

debate Limits of narrative coherence are discussed from the perspective of three fields of life that often threaten the coherence of narrative illness arts and traumatic political experience The authors of the book cover a wide range of disciplines such as psychology sociology arts studies political science and philosophy *Handbook of Narratology* Peter Hühn, Jan Christoph Meister, John Pier, Wolf Schmid, 2014-10-10 This handbook provides a systematic overview of the present state of international research in narratology and is now available in a second completely revised and expanded edition Detailed individual studies by internationally renowned narratologists elucidate central terms of narratology present a critical account of the major research positions and their historical development and indicate directions for future research

Blending and the Study of Narrative Ralf Schneider, Marcus Hartner, 2012-10-30 The theory of Blending or Conceptual Integration proposed by Gilles Fauconnier and Marc Turner is one of most promising cognitive theories of meaning production It has been successfully applied to the analysis of poetic discourse and micro textual elements such as metaphor Prose narrative has so far received significantly less attention The present volume aims to remedy this situation Following an introductory discussion of the connections between narrative and the processes of blending the contributions demonstrate the range of applications of the theory to the study of narrative They cover issues such as time and space literary character and perspective genre story levels and fictional minds some chapters show how such phenomena as metalepsis counterfactual narration intermediality extended metaphors and suspense can be fruitfully studied from the vantage point of Conceptual Integration Working within a theoretical framework situated at the intersection of narratology and the cognitive sciences the book provides both fresh readings for individual literary and film narratives and new impulses for post classical narratology

Making Time Carolin Gebauer, 2021-04-19 2023 Perkins Prize of the International Society for the Study of Narrative ESSE Book Award for Junior Scholars for a book in the field of Literatures in the English Language Responding to the current surge in present tense novels Making Time is an innovative contribution to narratological research on present tense usage in narrative fiction Breaking with the tradition of conceptualizing the present tense purely as a deictic category denoting synchronicity between a narrative event and its presentation the study redefines present tense narration as a fully fledged narrative strategy whose functional potential far exceeds temporal relations between story and discourse The first part of the volume presents numerous analytical categories that systematically describe the formal structural functional and syntactic dimensions of present tense usage in narrative fiction These categories are then deployed to investigate the uses and functions of present tense narration in selected twenty first century novels including Hilary Mantel's Wolf Hall Margaret Atwood's Oryx and Crake Ian McEwan's Nutshell and Irvine Welsh's Skagboys The seven case studies serve to illustrate the ubiquity of present tense narration in contemporary fiction ranging from the historical novel to the thriller and to investigate the various ways in which the present tense contributes to narrative worldmaking

The search for the defining qualities of narrative has produced an expansive range of definitions which largely unconnected with each other obscure the notion of narrativity rather than clarifying it The first part of this study remedies this shortcoming by developing a graded macro model of narrativity which serves three aims Firstly it provides a structured overview of the field of narrative elements and processes Secondly it facilitates the classification of narratological approaches by locating them on different stages of narrativity Finally it focuses attention on narrative dynamics as interpretative processes by which readers seek to produce narrative coherence The second part of this study identifies three different narrative dynamics which characterise Laclos's *Dangerous Connections* Kafka's *Castle* and Toussaint's novels Wagner bases her analyses of these dynamics not only on the texts themselves but also on the ways in which literary scholars imbue the texts with narrative coherence This book provides a long overdue systematisation of the jumbled field of theories of narrativity and opens new perspectives on the difficult relationship between narrative theory and interpretation *Story Logic* David Herman,2004-01-01 Featuring a major synthesis and critique of interdisciplinary narrative theory *Story Logic* marks a watershed moment in the study of narrative David Herman argues that narrative is simultaneously a cognitive style a discourse genre and a resource for writing Because stories are strategies that help humans make sense of their world narratives not only have a logic but also are a logic in their own right providing an irreplaceable resource for structuring and comprehending experience *Story Logic* brings together and pointedly examines key concepts of narrative in literary criticism

linguistics and cognitive science supplementing them with a battery of additional concepts that enable many different kinds of narratives to be analyzed and understood By thoroughly tracing and synthesizing the development of different strands of narrative theory and provocatively critiquing what narratives are and how they work Story Logic provides a powerful interpretive tool kit that broadens the applicability of narrative theory to more complex forms of stories however and wherever they appear Story Logic offers a fresh and incisive way to appreciate more fully the power and significance of narratives

Narrative Factuality Monika Fludernik, Marie-Laure Ryan, 2019-12-16 The study of narrative the object of the rapidly growing discipline of narratology has been traditionally concerned with the fictional narratives of literature such as novels or short stories But narrative is a transdisciplinary and transmedial concept whose manifestations encompass both the fictional and the factual In this volume which provides a companion piece to Tobias Klauk and Tilmann Kppe s Fiktionalit t Ein interdisziplin res Handbuch the use of narrative to convey true and reliable information is systematically explored across media cultures and disciplines as well as in its narratological stylistic philosophical and rhetorical dimensions At a time when the notion of truth has come under attack it is imperative to reaffirm the commitment to facts of certain types of narrative and to examine critically the foundations of this commitment But because it takes a background for a figure to emerge clearly this book will also explore nonfactual types of narratives thereby providing insights into the nature of narrative fiction that could not be reached from the narrowly literary perspective of early narratology

Narrative Paul Cobley, 2013-12-04 Human beings have constantly told stories presented events and placed the world into narrative form This activity suggests a very basic way of looking at the world yet this book argues even the most seemingly simple of stories is embedded in a complex network of relations Paul Cobley traces these relations considering the ways in which humans have employed narrative over the centuries to re present time space and identity This second revised and fully updated edition of the successful guidebook to narrative covers a range of narrative forms and their historical development from early oral and literate forms through to contemporary digital media encompassing Hellenic and Hebraic foundations the rise of the novel realist representations narratives of imperialism modernism cinema postmodernism and new technologies A final chapter reviews the way that narrative theory in the last decade has re orientated definitions of narrative Written in a clear engaging style and featuring an extensive glossary of terms this is the essential introduction to the history and theory of narrative

Handbook of Autobiography / Autofiction Martina Wagner-Egelhaaf, 2019-01-29 Autobiographical writings have been a major cultural genre from antiquity to the present time General questions of the literary as e g the relation between literature and reality truth and fiction the dependency of author narrator and figure or issues of individual and cultural styles etc can be studied preeminently in the autobiographical genre Yet the tradition of life writing has in the course of literary history developed manifold types and forms Especially in the globalized age where the media and other technological cultural factors contribute to a rapid transformation of lifestyles autobiographical writing has maintained even enhanced its
