Congress. House. Committee on Science, Space, and Technology (2011). Subcommittee on Space and Aeronautics, 2011 [How to Cool the Planet](#) Jeff Goodell, 2010-04-15 Thoughtful, informative and darkly entertaining It is the best treatment of this important and scary topic you can find Elizabeth Kolbert Right now a group of scientists is working on ways to minimize the catastrophic impact of global warming But they're not designing hybrids or fuel cells or wind turbines They're trying to lower the temperature of the entire planet And they're doing it with huge contraptions that suck CO₂ from the air, machines that brighten clouds and deflect sunlight away from the earth, even artificial volcanoes that spray heat-reflecting particles into the atmosphere This is the radical and controversial world of geoengineering which only five years ago was considered to be fringe But as Jeff Goodell points out, the economic crisis combined with global political realities is making these ideas look sane even inspired Goodell himself started out as a skeptic concerned about tinkering with the planet's thermostat We can't even predict next week's weather, so how are we going to change the temperature of whole regions? What if a wealthy entrepreneur shoots particles into the stratosphere on his own? Who gets blamed if something goes terribly wrong? And perhaps most disturbing, what about wars waged with climate control as the primary weapon? There are certainly risks, but Goodell believes the alternatives could be worse In the end, he persuades us that geoengineering may just be our last best hope, a Plan B for the environment His compelling tale of scientific hubris and technical daring is sure to jump-start the next big debate about the future of life on earth Goodell explores with infectious curiosity and thoughtful narration this strange, promising and untested suite of climate fixes BusinessWeek A quick, enjoyable read through a complex, timely topic And after you read it, you'll never look at the sky or the ocean or Earth really in quite the same way again The Christian Science Monitor **The Ancient Alien Theory: Part Four** C.R.
