Makes significant contributions to the scholarship on African Americans in the broad context of U.S. education and society. Addresses the central question in what ways do African Americans in corporate, private, and public positions influence and shape educational policy that affects African Americans. TEACHERS OF COLOR A wise scientist once argued that to doubt everything or to believe everything often results in the same solution: set both eliminate the need for reflection. This handbook provides an intellectual space for those interested in true reflection on the human ecology of the African American experience in schools, communities, and society. The Handbook of African American Education is a repository of information developed to advance the human service professional. William F. Tate IV, Washington University in St. Louis. This handbook represents the most comprehensive collection of research on African Americans in education to date. Its breadth spans the historical, the political, institutional, and community forces that have shaped educational opportunities and attainment among African Americans. The review of extant research on a range of topics from the role of culture and identity in learning, teacher preparation, educational leadership, to higher education and educational policy is far reaching and cutting edge. This volume has historic significance and will become a classic collection on African American education for scholars and practitioners alike. Carol D. Lee, Professor, Northwestern University, Vice President, Division G, American Educational Research Association. This handbook is needed as a basic reference for professors and graduate students conducting research on the education of Blacks in America. Frank Brown, University of North Carolina at Chapel Hill.
