Dr Adrian Haberberg, University of East London. *The Routledge Companion to Corporate Social Responsibility* Thomas Maak, Nicola Pless, Marc Orlitzky, Sukhbir Sandhu, 2021-08-25 While the concept and domain of Corporate Social Responsibility (CSR) are not new, its beginnings can be tracked back to the 1960s; its scope, urgency and relevance have shifted dramatically in recent years. CEO responses show that the majority of business leaders understand that they operate in an environment of contested values and that stakeholders expect companies to do better and more. However, many corporate incentive systems are not in sync with societal norms and expectations. Moreover, grand challenges such as climate change and global pandemics and growing interconnectedness shed light on the fault lines of value creation through complex supply chain systems exposing unacceptable working conditions, modern slavery and the environmental consequences of highly distributed production at any cost. As a consequence, corporate social responsibility has become a widely accepted common denominator of the role and responsibilities of business in society, ranging from core functions such as health, safety and environment standards to governance and recognition of stakeholders, supply chain design and corporations' stand on climate change and its responsibility to future generations. This volume assembles state-of-the-art scholarship from leading scholars in the field and enables a full range view of CSR from its roots, normative foundations and institutional perspectives to matters of stakeholding, the global value chain, social innovation and future directions. *The Routledge Companion to Corporate Social Responsibility* represents a prestige reference work providing an overview of the subject area of CSR for academics.

problematizes the win win assumption underlying discourses of CSR and suggests that it is a rhetoric that is invariably subordinated to that of corporate rationality Rather than see CSR as providing the means to transform corporations by advocating a stakeholder view of the firm it argues that CSR represents an ideological movement designed to consolidate the power of transnational corporations and provide a veneer of liberality to the illiberal economic agenda of the major global institutions Stewart Clegg University of Technology Sydney Australia Professor Banerjee offers us a refreshing analysis of corporate social responsibility CSR in an otherwise comparatively turgid literary landscape People may disagree with his criticism that because of its preoccupation with shareholder value the corporation is an inappropriate agent for social change but it is backed up by strong theoretical and substantive empirical
